APPENDICES	i—xlv

REPORT ON PUBLIC INSTRUCTION IN BOMBAY, 1892-93.

I.—GENERAL SUMMARY.

The following statement gives the attendance returns (General Table I in Appendix A) for the last two years:—

Class of Institutions.	Number of Institutions.		Number of Pupils.	
	1891-92.	1892-93.	1891-92.	1892-93.
Public Institutions.				
University Education—				
Arts Colleges	9	9	1,332	1,572
Professional Colleges	4	5	495	512
School Education, General—				
Secondary Schools	410	424	43,420	44,223
Primary Schools	9,031	9,307	518,284	525,817
School Education, Special—				
Training Schools	15	15	853	880
Other Schools	32	34	2,222	2,365
Total, Public Institutions ...	9,501	9,794	566,606	575,369
Private Institutions.				
Advanced	83	67	1,170	1,440
Elementary	2,688	2,746	66,662	69,573
Total, Private Institutions ...	2,771	2,813	67,832	71,013
Grand Total ...	12,272	12,607	634,438	646,382

Omitting the private institutions, that is to say, the institutions which are not under Government inspection, I find that in public institutions the number of boys under instruction has risen from 499,174 to 507,028 and the number of girls from 67,432 to 68,341, while for boys and girls together the average monthly number on the rolls has risen from 546,925 to 558,389 and the average daily attendance from 413,427 to 416,632. The ratio of the average daily attendance to the average monthly number on the rolls has, however, fallen from 76 to 74. The increase for public institutions is distributed below :—

	Schools.	Pupils.
	Increase.	Increase.
Arts Colleges	...	240
Professional Colleges	1	17
Secondary Schools	14	803
Primary Schools...	276	7,533
Training Schools	...	27
All other Special Schools ...	2	143
Total ...	293	8,763

2. General Table III gives full details as to the attendance in the different classes of public schools and the figures contrast with those of the previous year, as under :—

Class of Schools.	Number of Schools.		Number of Pupils.		Schools.		Pupils.	
	1891 92.	1892 93.	1891 92	1892-93	Increase.	Decrease.	Increase	Decrease.
Government	87	85	12,040	12,554	...	2	514	..
Local Boards	4,231	4,246	228,844	230,797	15	...	1,953	...
Municipal Boards	801	792	87,020	86,850	...	9	.	170
Native States	2,096	2,184	126,005	128,608	88		2,603	...
Aided	2,147	2,298	101,864	104,555	151	...	2,691	
Unaided	139	189	10,833	12,005	50	...	1,172	...
Total ..	9,501	9,794	566,606	575,369	304	11	8,933	170

The results of the public examinations will be found in General Table VI, and the stages of instruction in schools for general education are shown in General Table V. The number of pupils learning English has risen from 45,496 to 46,945, the number learning a classical language from 19,093 to 20,576, and the number learning a vernacular language from 538,791 to 546,796. The distribution of the pupils according to race is given below :—

	1891-92.	1892-93
Europeans and Eurasians	4,043	4,221
Portuguese and Native Christians ...	9,225	9,512
Jews	1,311	1,616
Parsis	13,457	13,800
Mahomedans	97,186	98,691
Hindus	433,761	439,604
Aboriginal and hill tribes	6,986	7,243
Others	637	682
Total ...	566,606	575,369

The increase of pupils for each of these races has thus been as follows, omitting small fractions :—

Jews	23·2 per cent.
Europeans and Eurasians	4 4 „
Portuguese and Native Christians	3 11 „
Parsis	2·5 „
Mahomedans	1·55 „
Hindus	1 1 „

3. The distribution of the schools throughout the Presidency is as under :—

Districts and Native States.	Area in square miles.	Number of Towns and inhabited Villages.	Estimate of Population.	Number of Schools.	Number of Pupils on the rolls on 31st March 1893.	Increase and Decrease of the year: Schools. Increase.	Schools. Decrease.	Pupils. Increase.	Pupils. Decrease	Number of Schools not yet recognised by the Department and shown in columns 12 and 13 of General Table I	Number of Pupils in such Schools.	Percentage of total Pupils in columns 6 and 12 to population	Number of Villages with Schools	Average number of square miles to each Village with a School.

						Net result Increase 293		Net result Increase 8,763						

4. The total expenditure from all sources is given in General Tables II and IV and the figures contrast with those of the previous year as under :—

Years.	Provincial Funds.	Local Cess.	Municipal Rates.	Fees.	All other sources.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1891-92 ...	19,65,632	8,67,695	3,63,759	13,36,002	17,47,616	62,80,704
1892-93 ...	19,65,950	9,54,921	4,12,004	13,84,384	19,17,927	66,35,186

The increase in the expenditure from *Local cess* and from *Municipal rates* is due to increased expenditure on buildings and on the teaching staff; and the increase under *Fees* and *All other sources* is due to the increase in the number of schools. Various percentages are worked out in General Table II and the total expenditure of the year is divided between the different funds, as under :—

	Percentage for British Districts.	Percentage for Whole Presidency.
Provincial Funds...	35·5	29·7
Local cess	17·2	14·3
Municipal rates	7·4	6·2
Fees	21·9	20·9
Revenues of Native States (including cess and rates)	·2	12·4
All other sources...	17·8	16·5

It will be seen that compared with last year the receipts from fees and other sources were higher by Rs. 2,18,693, while the total expenditure from Provincial Funds, Local cess and Municipal rates was higher by Rs. 1,35,789.

The share which each class of institutions has in the total expenditure is as follows :—

Cost of Public Institutions classed as	1891-92.	1892-93.
	Rs.	Rs.
Government	8,71,105	8,97,029
Local Board	14,12,078	15,04,911
Municipal Board	6,30,081	7,11,160
Native State	9,66,369	10,04,233
Aided	16,59,646	16,32,647
Unaided	2,03,620	3,27,727
General	5,37,805	5,57,479
Total ...	62,80,704	66,35,186

and again :—

	1891-92.	1892-93.
	Rs.	Rs.
Arts Colleges	3,14,300	3,19,066
Professional Colleges	1,16,263	1,12,305
Secondary Schools	15,78,853	16,20,437
Primary Schools	27,83,084	28,84,824
Special Schools	4,79,935	5,15,938
Buildings and apparatus	4,70,464	6,25,137
University	1,17,572	1,16,338
Direction and Inspection	3,15,419	3,28,881
Scholarships	98,433	1,00,449
Miscellaneous	6,381	11,811
Total ...	62,80,704	66,35,186

5 The following table compares the net expenditure from Provincial Funds for the last two years :—

		1891-92.	1892-93.
		Rs.	Rs.
University Education ...	Arts Colleges	1,37,353	1,39,171
	Professional Colleges ...	70,361	68,367
School Education, General ...	Secondary Schools ...	3,40,905	3,50,012
	Primary Schools... ...	6,54,881	6,92,432
School Education, Special ...	Training Schools ...	84,276	85,324
	Medical Schools	33,886	34,828
	Other Special Schools ...	1,38,458	1,53,939
Buildings and apparatus ...	... ...	1,98,999	1,22,790
University	... ...	15,000	10,000
Direction and Inspection ...	... ...	2,56,634	2,64,005
Scholarships	... ...	28,498	33,271
Miscellaneous... ...	... ...	6,381	11,811
	Total ...	19,65,632	19,65,950

The increase under *Arts Colleges* is mainly due to the appointment of an additional Professor in the Deccan College. The decrease under *Professional Colleges* is owing to the absence of special grants for apparatus which were made in 1891-92. The increase under *Secondary Schools* is due to the development of aided schools and that under *Primary Schools* is on account of additional grants made to Local Board and indigenous schools in Sind. The increase under *Training Schools* is due to the Hyderabad Training College for Mistresses having for the first time fully drawn the grant sanctioned by Government. The increase under *Medical Schools* is on account of the larger expenditure incurred by the Medical Department; but this is expenditure outside the Educational Budget. The increase under "*Other Special Schools*" is due to the larger expenditure incurred on the Sir J. J. School of Art and the development of the Agricultural and Forest classes attached to College of Science, Poona. The large decrease under *Building grants* is due to the limited provision of funds allowed by Government for buildings. The decrease under *University* is on account of the grant made by Government having been reduced. The increase under *Direction* and *Inspection* is owing to the acting allowance drawn by the Acting Director and to the strengthening of the Inspecting Staff. The increase under *Scholarships* is due to the new scheme of scholarships in High and special schools having reached its maximum, and the increase under *Miscellaneous* is due to the large expenditure incurred in the Sind Book Depôt for printing and purchasing new books.

6. The payments to aided institutions are shown in General Table IV to have fallen from Rs. 4,34,026 to Rs. 3,73,107, the decrease being entirely due to the smaller expenditure on buildings, which is shown in the next para. The ordinary grants to colleges and schools rose from Rs. 3,32,342 to Rs. 3,52,073, while the special grants rose from Rs. 4,027 to Rs. 6,068. These special grants were Rs. 4,000 for the Sind Arts College, Rs. 1,000 for the Victoria High School, Poona, Rs. 500 for the Wilson College, Rs. 378 for the Basel German Mission High School, Dhárwár, Rs. 102 for the Municipal Schools in Sind and Rs. 88 for the Convent School, Igatpuri.

7. The following table shows the building grants from Provincial Funds for the last two years :—

	1891 92.	1892 93.
Grants to Government Schools ...	...	1,748
Do. Board Schools, ...	93,256	94,610
Do. Aided Schools ...	96,487	20,364
Total ...	189,743	116,722

The grants for the year under report were as under :—

	Rs.
Female Normal School, Hyderabad	20,000
Municipal School No. 1, Dhulia	19,300
Sind Madrasa	7,006
St. Joseph's Convent School, Karáchi	5,394
Manoli School, Belgaum	3,184
Betawad School, Khándesh	2,963
Rohri Schools	2,500
Murud School, Ratnágiri	2,447
Education Society School, Bombay	2,350
Camp Schools, Sholápur	1,852
Yavalgal School, Dhárwár	1,838
Nadiád High School	1,748
Guhagar School, Ratnágiri...	1,697
Karjat School, Kolába	1,536
Khatáo School, Sátára	1,520
Sanklipur School, Dhárwár	1,463
Sortur School, Dárwár	1,453
Jeur School, Ahmednagar	1,448
Bagni School, Sátára	1,421
London Mission High School, Belgaum	1,348
Yellur School, Sátára	1,211
Aigali School, Belgaum	1,173
Hallikeri School, Dhárwár	1,126
St. Peter's School, Bombay	1,028
Hindu-Sindhi School, Karáchi	1,008
Small grants	28,708

The expenditure from the Public Works Budget on Government buildings in 1892-93 was as under:—

	Rs.
(a) Repairs	27,448
(b) Minor Works (up to Rs. 1,000)	2,355
(c) Large Works (above Rs. 1,000)*	30,547
Total Public Works Department Budget ...	60,350

II.—UNIVERSITY EDUCATION.

8. **Arts Colleges.**—Particulars as to the Colleges affiliated to the University will be found in Form I of Appendix A, and the attendance in Arts Colleges is shown below :—

Colleges.	Number on the Rolls at the end of the year.		Average monthly Number on the Rolls.		Average daily attendance.		Fee Receipts.	
	1891-92.	1822-93.	1891-92.	1892-93.	1891-92.	1892-93.	1891-92.	1892-93.
							Rs.	Rs.

Total ...	221	68	82	110	12	6	3
Total for previous year.	159	...	149	129	6	3	6

11. Elphinstone College reports results of the recent University examinations remarkably creditable. All the candidates placed in the first class were Elphinstoneans and 4 of the University scholarships and prizes were awarded to students of the College. The number on the rolls and the amount of fee receipts were the highest yet recorded and the position of the College will be regarded by Government as satisfactory. The results of the University examinations of the Deccan College were good and both the number of students and fee receipts were higher than last year.

12. **Law Schools.**—The fees in the Bombay school again fell from Rs. 12,165 to Rs. 9,905 and the attendance returns are as under :—

	March 1892.	March 1893.
Senior Students	86	76
Junior do.	74	52
First LL.B. Class	40	54
Total ...	200	182

The Government Professor of Law explains that the decrease resulted from the application of new rules for admission to the University examinations which he believes will for a time, but only for a limited time, diminish the number of his students. Forty-nine students presented themselves for the first examination of whom 15 passed. For the second examination one candidate appeared this year and passed. There were 106 candidates for the examination of the Degree of LL.B. and 43 passed. In the Poona class the number of students rose from 22 to 27, while the fee receipts fell from Rs. 1,020 to Rs. 975. Three students passed the first examination for the Degree of LL.B. The receipts for last year were increased by Rs. 25 due for arrears having been paid during this year, while the apparent diminution of receipts for the year under report is due to the payment of Rs. 50 after the accounts had been closed.

13. **Grant College.**—The fee receipts rose from Rs. 19,640 to Rs. 20,221 and the attendance returns are as under :—

	March 1892.	March 1893.
University Classes ... Men	151	158
University Classes ... Women	19	21
Candidates in Certificated Practitioners' Class for Women ...	7	8
Military Pupils	45	52
Total ...	222	239

Here as in the Arts Colleges the report shows that the College is flourishing. The Principal states that he is certain that Physiology and Chemistry are better taught in the Grant Medical College than in any Medical School of the United Kingdom, and of the results of the University examinations he is able to report better results than have been recorded for many years. Of the College generally he says :—" I now regard the College is in a more flourishing condition than it has ever been." Extracts from the Principal's report will be found in Appendix B.

14. **The College of Science.**—An extract from the report of the Acting Principal is printed in Appendix C. The fee receipts have fallen from Rs. 8,065 to Rs. 7,430 and the attendance returns of the several departments of the College are as under :—

	1891-92.	1892-93.
University Department ... Engineering Course ...	47	54
University Department ... Science Course	3	7
Agricultural Department	19	27
Forest do.	19	25
Mechanical do.	126	147
Total ...	214	260

The excess of fees in 1891-92 over the sum collected in 1892-93 is owing to the number of students on the roll being greater in the second term of 1881-92 than in that of 1892-93.

Progress of the Colleges since the first year when the Bombay University conferred the degree of B.A.

The recent retirement of Mr. Vaman Abaji Modak appears to suggest a short comparison between the position of the Colleges as they now are and as they were when Mr. Modak graduated, for he was one of the four first students upon whom the University of Bombay conferred the degree of B.A. and is now the only B.A. of the year 1862 when Mr. Modak was a student of the Elphinstone College and was placed in the second class, or " division " as was then the term used, in the examination for the degree of Bachelor of Arts. At that date there were only 3 Arts Colleges affiliated to the University, Elphinstone College

with 44 undergraduates, Poona now Deccan College with 11, Free General Assembly's Institution now Wilson College with 2. The fee receipts at Elphinstone College were Rs. 980 and at Deccan College Rs. 490.

The corresponding figures for the year under report are—

	Students.	Fee Receipts.
Elphinstone College...	... 350	29,383
Deccan College	... 179	12,005
Wilson College	... 332	18,710
Government Law School	... 182	9,905
Grant Medical College	... 239	20,224

In addition to this development of the Colleges existing in 1862, the present report shows the following Colleges as now affiliated:—

1. St. Xavier's College, Bombay.
2. Gujarát „ Ahmedabad.
3. Rájárám „ Kolhápur.
4. Baroda „ Baroda.
5. Fergusson „ Poona.
6. Sámaldás „ Bhávnagar.
7. D. J. Sind „ Karáchi.
8. Government Law School, Bombay.
9. „ Class, Poona.
10. Gujarát „ „ Ahmedabad.
11. Sind „ „ Karáchi.
12. Baroda „ „ Baroda.
13. Grant Medical College, Bombay.
14. College of Science, Poona.

The total number of candidates who presented themselves for University examinations of all kinds in the year 1862-63 was 185. The corresponding number for 1892-93 was 6,281. These statistics present a picture of the growth and expansion of higher education in this Presidency in one generation. The widespread and interpenetrating influence of the University is shown by the fact that from the Bench of the High Court to the place of lowest assistant in a village school, public offices of every degree of importance are now held by men who have been brought as students under the influence of the University. The character of that influence is largely determined by the character of the Colleges.

III.—SECONDARY SCHOOLS.

15. The Matriculation examination was conducted at Bombay, Poona, Ahmedabad and Karáchi, and out of 1,571 candidates sent up by the schools 917 passed, while only 137 passed out of 1,348 candidates who went up without school certificates:—

Schools.	1892.	
	No. of Candidates sent up.	No. of successful Candidates.
Poona New English School	104	66

18 The number of Government schools in the Central Division remains the same as last year, *viz.* 6; but there is an increase of 126 pupils. The fee receipts also have risen from Rs. 67,276 to Rs. 71,242, the increase being chiefly marked in the Elphinstone and Násik High Schools. The Poona High School shows a decrease of Rs. 170 this year, attributable to the strong competition amongst the Poona schools, to which reference has been made in several recent reports. All six schools show some increase of scholars except the Elphinstone High School, which contains nearly the same number as last year. Mr. Wáman A'báji Modak retired from the Principalship of the Elphinstone High School at the end of the calendar year, after 30 years' service in connection with secondary education. Mr. Modak's high character won for him the universal regard of his colleagues, and he will enjoy his well-earned pension with the best wishes of all who ever had official relations with him. With regard to the Anglo-Vernacular Aided High Schools the inspections were on the whole fairly satisfactory and in all cases the full grant-in-aid was sanctioned. As a whole it may, I think, be said that a gradual improvement is being effected. Unaided High Schools are one more than last year by the addition of the newly constituted Gokuldás Tejpál High School. Mr. Giles reports that the number of Government High Schools remains the same, but the attendance figures show a decline of 18. This is owing to a large decrease in the Broach High School on the date when the year closed; but the average monthly number and average daily attendance at Broach show an increase, and the fee receipts rose by Rs. 416. There was a slight falling off in the numbers in the Nadiád High School. The Thána High School shows a decrease also in attendance and fee receipts, attributable to the opening of rival schools and to a cholera scare in the rains. On the other hand, the Ahmedabad and Surat High Schools show a considerable increase in attendance and fee receipts. There is a good increase in the numbers in the Surat Mission High School. All the schools in Native States show an increase in numbers. All the High Schools except Wadhwán are located in excellent buildings. The Morvi State has opened a new high school. The main feature of interest with regard to high schools generally is the tendency towards greater order and neatness, improved methods of teaching and improved apparatus. These improvements are not by any means confined to the Government high schools, for the high schools in Native States rival them in efficiency and in the completeness of their accessories. Mr. Patwardhan reports that the number of schools in the Southern Division remained stationary during the year, but that there was a small decrease of 58 pupils. Of the total attendance, *viz.* 3,333, 1,300 belong to the towns proper and the rest, 2,033, to the mofussil towns and villages. The fee receipts in

Government schools have increased from Rs. 26,055 to Rs. 26,701. The prefect system introduced in high schools has been working well. The Acting Educational Inspector in Sind reports that with the exception of the upper grade school at Hyderabad which has been closed there is no alteration in the number of schools in Sind, but that the collective attendance shows a slight falling off. The number of Mahomedans receiving secondary instruction was 344, of whom 239 were in the high school stages. The fee receipts of the three Government high schools show a net decrease of Rs. 1,141 during 1892-93, as both at Karáchi and Shikárpur there was a falling off in the average monthly number on the rolls, but the Hyderabad Government high school gained in fee receipts. The fee receipts of the aided schools show a net increase of Rs. 941, the greatest advance being again made by the Union Academy. The Hyderabad masters' elocution class, which had the benefit of Mr. Jacob's personal supervision and direction, has effected a marked improvement in the pronunciation, accent and delivery of the students of English at Hyderabad. The study of drawing continues to be popular in the high schools.

19. **Middle Schools.**—The returns for middle schools are as under :—

Division.	Managed by Government.				Managed by Local Boards.				Managed by Municipal Boards.

20. Mr. Kirkham reports that the number of departmental middle schools remains the same as last year. Of the Poona Camp School he says that it

was found in its usual condition of high efficiency and that the school is an excellent example of what a middle school may be as ancillary to a high school. The Mahomedan classes continue to be most satisfactory. The Government House Establishment School did very satisfactory work in the examination. The number of Local Board middle schools remains the same as last year. Municipal middle schools have fallen from 31 to 28. The schools closed during the year were at Dharangaon, Varangaon and Taloda in the Khándesh District. The Native State schools of this class are the same as last year. The list of aided schools in Bombay has been altered by the transfer of two schools from girls to boys and in the mofussil by the exclusion of the G. I. P Railway school at Lanoli, the annual statistical returns of which were not received in time. Mr. Kirkham reports that a fair average of efficiency has been maintained. Mr. Giles reports that the number of Government institutions for boys remains the same. The Kaira School has been transferred to the Municipal Board and the aided list, but the aided school at Godhra has been converted into a provincial school. That all the Government schools are efficient and that the Surat Middle School has a substantial increase of pupils. The Municipal Board schools show an increase of 2 schools. The schools at Sánand, Mahudha and Kaira have been added to the list, while the Godhra School has been transferred to the list of Departmental Schools. In Native States the number of schools has increased by one, a new school having been opened at Lathi. The Bhávnagar Middle School continues to be the largest in Káthiáwár and is very efficient; that aided schools under private management have increased by two, the Broach Hitechhu Sabha, the Jatalsar and Mándvi Schools having been brought on the list, while the Umreth Anglo-Vernacular School has been transferred to the unaided list; that the schools generally show an increase of 108 pupils; that the unaided Anglo-Vernacular schools show an increase of 8 and decrease of 1; that of English teaching aided the number remains the same, while the Jatalsar School appears for the first time, that of the unaided English teaching schools there is a decrease of two schools. Of the middle schools for girls, the Anglo-Vernacular School attached to the Mahalaxmi Female Training College shows a slight increase in numbers and is efficient. Among aided English teaching schools the St. Joseph's Convent School at Bandora maintains its high position and has a large increase in numbers. Mr. Patwardhan reports a decrease of 1 school. The classes at Bomanhalli and Herekerur in Dhárwár were closed and a new class at Shindgi in Bijápur was opened during the year. The Municipal Board schools show an increase of one school, which is owing to the opening of a 1st grade Anglo-Vernacular school at Chiplun in Ratnágiri. Of schools managed by Native States the number rose from 24 to 30. Of aided middle schools (boys and girls) there is a decrease of 1 school for boys and an increase of 1 school for girls. The St. Joseph's School at Dhárwár, which contains more girls than boys, is transferred to the list of girls' schools; the private Anglo-Vernacular school at Ratnágiri ceased to be borne on the aided list, while the private unaided school at Murud was brought on the aided list. Of unaided schools the Inspector says that there is a net increase of 2 schools and 137 scholars, but that as these schools are generally opened for profit and are not under competent teachers, they are consequently not well managed. Mr. Alumal Trikamdas reports that the increase in the number of schools of this class is nominal. The English class, which the Municipality of Ketibandar had opened as an experimental measure, has ceased to exist since the close of the year. Of the Kotri school, 45 pupils, the Inspector says that it shows considerable advance and is in good order. The pretentious school at Ketibandar (4 pupils) has, since the close of the year, ceased to exist. The Hyderabad District owns 2 Local Board middle class schools, one at Tharusha (21 pupils) and the other at Miran-jo-Tando (11 pupils), and 4 aided schools. The Tharusha School is said to have done satisfactorily on the whole. The Miran-jo-Tando School has been placed under an experienced and able teacher. Bhiria School (36 pupils) continues to be efficient and is making steady progress. The Kandiáro School (20 pupils) will never make good its pretentions so long as the teaching power is not improved and strengthened. The school in attempting too much again only courted failure. The results of the examination have been accordingly very disappointing. The Parsi Virbháiji School at Karáchi (46 pupils) is in as good an order as ever.

21. **Schools for Europeans and Eurasians.**—The special returns required by the Government of India are as under :—

Mr. Kirkham reports that the returns of the Railway school at Lanoli were received too late to be included, but notwithstanding this loss, the number of pupils in European schools shows an increase, *viz.*, 3,082 against 3,023 last year, and that this class of schools had on the whole a good year. The societies which make European education their care make the most unremitting efforts to constantly improve the buildings, equipment and teaching staffs of their schools; that the unpaid labours of these societies have been of unspeakable value to the European community, and that the chief weakness continues to lie in the subordinate teaching staff. Mr. Giles accorded as usual high praise to the Cathedral High Schools. He was also well satisfied with the two Convent Schools in the Fort and at Byculla, but condemned the Fort premises as insanitary and unsuitable. Mr. Giles also reports that the St. Peter's Boys' School had "quite retrieved its position" and is now a very efficient institution. Mr. Kirkham records a favourable note on the Scottish Education Society's Schools at Byculla and in the Fort; and Mr. Sahasrabudhe reports well of the results of his examination of the Scottish Orphanage, Máhim. The Inspector was well satisfied with the year's work in the Byculla Schools and the Indo-British Schools. Mr. Sahasrabudhe inspected the Indian Female Normal School Society's Girls' School at Girgaum and praised its work very highly. The group of G. I. P. Railway schools at Lanoli, Igatpuri, Bhusával, Sholápur and Sháhábád were all found doing fairly well, as was also the B. B. & C. I. Company's school at Parel. The European schools at Poona maintained their reputation, and St. Vincent's reached a higher standard of efficiency than on any previous occasion. Mr. Giles reports "The Abu Lawrence School continues to be as efficient as ever. It is quite one of the best schools I know. The Railway school at the same place has got largely increased numbers, and is for the present under efficient management." The Ahmedabad Railway School has larger numbers and is an efficient and well managed school. The school at Ghadechi has been transferred to the list of English-teaching Schools Mr. Patwardhan reports that the number of these schools is stationary (3), but the attendance increased from 77 to 94. St. Mary's Boys' School at Belgaum is attended by 37 pupils (20 boys and 17 girls) against 33 (17 boys and 16 girls) of last year. The European and Indo-European Girls' School, Dhárwár, is attended by 26 pupils (15 girls and 11 boys) against 26 (16 girls and 10 boys) of last year. The accommodation is suitable and sufficient and the teaching staff adequate. Southern Marátha Railway Girls' School at Hubli is attended by 31 pupils (19 girls and 12 boys) against 18 (12 girls and 6 boys) of last year. Mr. Alumal Trikamdas reports that the number of these schools is now 6 and the number on the rolls at the close of the year stood at 500 against 516 on the 31st March 1891-92. 'Every one of the schools of this class excepting the one at Manora has lost slightly in attendance; and all excepting the European and Eurasian School at Kotri

show decreased fee receipts, which is chiefly attributed to the regulation of fees according to the income and social status of parents. The increase in expenditure is owing to the strengthening of the teaching staff in the Grammar School and the European and Eurasian School at Kotri. The schools at Manora, Kotri, and Sukkur though small, are well managed. The local committees are strong and take an interest in the schools confided to their care. The Convent school keeps up its reputation. The expenditure on these schools was as under :—

	Aided.					Unaided.			Total Expenditure from				Grand Total.

The total number of primary schools has increased by 261. This is chiefly in the Northern and Sind Divisions. In the Northern Division owing principally to a large increase in the schools maintained by Native States and in Sind to aided schools.

23. *Local Boards.*—A statement showing the receipts and disbursements of the separate educational funds for the year under report will be found in Appendix D, and the following table shows the use which the cess-payers make of their schools :—The percentages are practically the same as last year :—

	Second Grade Anglo-Vernacular Schools.			Vernacular and Special Schools.		
	Total number on Rolls.	Cess payers.	Proportion per cent.	Total number on Rolls.	Cess payers.	Proportion per cent.
Central Division...	44	29	65·9	78,763	53,706	68·1
Northern do.	57	50	88·	70,678	54,194	77·
Southern do.	139	121	87·	82,470	61,783	74·9
Sind	32	11	34·3	36,588	14,261	38·9
Total ...	272	211	77·6 Average.	268,499	183,944	68·5 Average.

Mr. Kirkham says that the schools continue to slightly diminish in number whilst the number of pupils continues to increase. The consequence of this is that the number of pupils in each school, tends to increase and the Local Board schools more and more to become model schools affording an example to a circle of indigenous and other aided schools in the neighbourhood. The policy of concentration is forced upon us, by the fact that the Local Fund's Educational Rate is fixed by law at 2 per cent., and that the income is thus practically inelastic, whilst the demands for expansion and for improvements go on increasing. In the year under report the Central Division received an increase to the Povincial grant of Rs. 7,500. With regard to the efficiency of the Local Board schools the year has been a favourable one. Mr. Giles says that the large increase in the average monthly number of pupils in Local Board schools is gratifying. Speaking generally the increase in pupils is not, however, in proportion to the increase in the number of the schools. This is ascribed by the Inspector to the combined influences of a season abnormally feverish and unhealthy with a year in which more marriages than usual were celebrated. In the Northern part of Gujarát, in Káthiáwár, and in the Mahikántha and Pálanpur Agencies, fever of an unusually virulent type raged for three or four months in the end of 1892 and beginning of 1893, and so great was the effect on schools that in some cases the annual examination was almost a farce, as there were no pupils in a fit state to be examined. This unusual fever was no doubt due to a very heavy rainfall following upon two or three years of drought. The marriage season was also peculiar, for instead of there being two periods of the year for marriages, these were this year generally celebrated at one period, and the effect upon schools

was most demoralising. The general opinion of the Deputy Inspectors is that School Committees and Táluka Boards are gradually learning to take a greater interest in education. Mr Patwardhan reports a net decrease of 11 schools and a net increase of 383 pupils. The increase in scholars is very largely due to Belgaum, though Dhárwár, Bijápur and Kánara show a fair measure of increase. Ratnágiri and Kolába show decrease both in schools and scholars. The fee receipts, however, increased from Rs. 55,893 to Rs. 56,859. No village master in the Division now gets less than Rs. 10 and no assistant less than Rs. 7 per mensem. This reform, though small in appearance, required an additional expenditure of Rs. 2,700 per mensem. The Acting Inspector in Sind reports that the attendance in the 343 cess schools now existing has gone up to 12,707. The average monthly number on the rolls has risen from 12,172 to 12,464. The long felt want of an Arabic-Sindhi map of the Bombay Presidency has been met. The supply of trained men, which has gradually increased, has led to marked improvement in the registration of attendance, better school discipline and greater honesty and system at examinations. Many Táluka Local Boards still hold back their consent to the levy of fees in their schools.

24. *Municipal Boards.*—The lists of schools transferred to the Municipal Boards will be found in Appendix E. Mr. Kirkham reports that the total number of schools has decreased from 275 to 271, whilst the pupils have increased from 29,813 to 30,477, an increase of 664 accompanied by an increase of school fees of Rs. 1,496. The inspection reports on municipal schools have been on the whole fairly satisfactory, but there is a great deal of difference in the effectiveness of the supervision in different places. The Municipal Commissioners are themselves supposed to visit the schools, but the cases in which this is done on any system or to any effect are rare, and in not a few instances the supervision is lax, casual and ineffective. Roughly speaking the division between efficient and inefficient Municipalities corresponds with the division large and small, and while the former class tends to improve the other rather tends to deteriorate. The municipal school system in the Island of Bombay continues to work smoothly and efficiently and the corporation in the year under report again raised its municipal assignment of funds from Rs. 51,300 to Rs. 55,220. Mr. Giles reports a general falling off in the attendance at municipal schools in all districts except the Panch Maháls. In the Ahmedabad District the chief decline is due to the Dhollera schools which have lost 89 boys during the year. There is no noticeable increase or decrease in other Boards in the district. It must, however, be remembered that the two reasons, adverse to progress, which have been put forward with reference to Local Board schools have operated equally powerfully in municipal schools. Mr. Giles specially notices the energy of the Surat School Board which has been attended with great success. Mr. Patwardhan reports that the number of these schools rose from 119 to 120 and of scholars from 14,067 to 14,410. The Acting Educational Inspector in Sind reports that in Karáchi the Corporation has considerably raised its grant for educational purposes. School accommodation has been improved with the increase in attendance. The schools in the larger towns are on the whole in an efficient and prosperous condition. The Arabic-Sindhi and Maráthi schools at Karáchi and the Tatta Vernacular School keep up their reputation as model schools in the Karáchi District, and that the Lárkhána, Sukkur and Rohri schools are well managed and are thriving.

25. *Native States.*—Mr. Kirkham says that all the schools continue in a fair state of efficiency and reports that the Chief of Bhor has responded to the departmental recommendations to pay the primary teachers in the State somewhat better wages. Mr. Giles reports that the number of schools has risen from 1,230 to 1,304 and there is an increase of 1,306 in the total number of pupils on the rolls, the total figures being 75,396 against 74,090 in 1891-92. Of the 74 new schools, 56 have been opened by the Morvi State. Some of these existed before, but he has only this year got returns of them. 13 schools have been opened in the Rewa Kántha, 4 in Pálanpur, 2 in Cambay, 2 in Kutch and 1 in Dharampore, while 3 schools have been closed in the Mahi Kántha and 1 in Bánsda. Mr. Giles says that he saw a large number of primary schools in Native States, and can testify to their prosperity and to the fact that they have, in large towns, reached the highest standard attained by schools in British districts. In some

respects the States have set an example which our large municipal towns might well follow. He especially refers to the primary schools in the Rájkot City. Mr. Patwardhan says that the number of schools remained stationary but the attendance rose from 29,364 to 30,092. The fee receipts also rose from Rs. 17,694 to Rs. 18,621.

26. *Aided Schools.*—Mr. Kirkham says that the number of aided primary boys' schools is nearly the same, *viz.*, 374 against 375 of last year, but the number of pupils has risen from 18,688 to 19,046. There is an increase of 433 pupils in the Sholápur District, 98 in Sátára, 22 in Ahmednagar, 87 in Khándesh and 108 in Bombay, whilst there is a decrease of 238 in Poona and 152 in Násik. Mr. Giles reports that the total number of schools is the same as in 1891-92, and the number of pupils has increased by one. The condition of these schools is generally the same as reported last year and no special remarks are required. Mr. Patwardhan reports that the number of these schools has increased from 400 to 437 and of scholars from 13,355 to 13,898, but the fee receipts fell from Rs. 21,389 to Rs. 20,392. All the schools aided under Chapter V are under Mission agencies, *viz.*, 3 in Belgaum, 7 in Dhárwár and 2 in Bijápur, and are reported to be doing well. Of the 343 schools aided under Chapter VI, 3 are under Mission agencies and 340 are under Native agencies. Of these, 49 are within Municipal limits and 291 within Local Board areas. The Acting Educational Inspector in Sind reports that the increase of 94 in the number of aided schools is chiefly due to Karáchi, Hyderabad, and Shikárpur, which make almost equal contributions. The Upper Sind Frontier also adds 11 schools to the number. The attendance has gone up from 29,592 to 30,835 and the Hyderabad District contributes 625 towards the increase. It is satisfactory to note that the number of scholars, who are taught writing in addition to reading, has increased considerably; and that a large number of indigenous schools have been returned as imparting instruction in Sindhi or Persian or both. No less than 2,005 boys and 784 girls have been returned as receiving education of a strictly secular character in the Mulla schools of the Karáchi District. The returns for the Shikárpur District are equally satisfactory. The extension of the system of aid to indigenous schools is gradually solving the problem of Mohomedan education in the province in the elements of reading, writing and ciphering.

27. *Police Schools.*—In the Central Division the school at Poona is reported as the best of this class. In the Northern Division the Thána School has improved in both numbers and efficiency. In the Southern Division there is a Police school at the head-quarter station of each district. The schools at Belgaum, Kánara, and Ratnágiri are doing pretty well, but those at Dhárwár, Bijápur, and Kolába are not well managed. The school at Kolába has recently been placed under a qualified master and is expected to show improvement next year.

28. *Night Schools.*—Mr. Kirkham reports that the number of night schools of all classes in the Central Division has decreased by 12 and the number of pupils by 495, but adds that this is a peculiarly unstable class of schools and it is often difficult to assign definite causes for their coming or going. Mr. Giles observes that the total number of night schools for the whole division is 140 against 146 last year and of pupils 2,839 against 3,083, but that the fever epidemic of this year sufficiently accounts for the decrease which has taken place. Mr. Patwardhan reports this class of schools in the Southern Division is generally dying out, the total number of schools having fallen from 31 to 18. Mr. Alumal Trikamdas reports that in the Karáchi District the Municipality of Karáchi continues to maintain 3 night schools with an attendance of 72, but of these the Gujaráti night school shows no vitality. The other two have been doing fairly well. Professor Pádsháh maintains a night school in Karáchi, which is doing good work. The night school at Tatta is pretty well attended. In the Hyderabad District there are altogether 20 night schools with an attendance of 342. Of these only 2 are situated in the town of Hyderabad and Tando Mahomed-khan, are kept up at municipal expense and are in fair order. The Jacobabad Municipal School is in a thriving condition. In Thar and Párkar the number of schools was 15 against 13 at the close of 1891-92 and the attendance rose

from 230 to 236. They are all maintained at the cost of the Local Funds of the district and have been favourably reported upon this time.

29. *Unrecognised Schools.*—Mr. Kirkham reports 653 schools with 21,014 pupils, showing a decrease of 120 schools and 1,940 scholars as compared with the figures collected last year. The decrease is chiefly in the Sátára District. Of the 653 schools 8 teach Arabic or Persian, 26 Sanskrit, 49 the Koran and 570 are ordinary primary schools, of which 3 are for girls. In the Northern Division there are 837 schools with 29,800 pupils. Of these schools 457 teach the vernacular, 344 are Koran schools, 13 are Arabic, 14 Sanskrit, 8 English and 1 a Zend school. The returns are considerably larger than in last year, which is due chiefly to the larger number of Koran schools returned, which last year were 167 only. Twenty of the Koran schools are girls' schools. In most of the ordinary vernacular schools the fee rates vary with the status of the parents, but are usually higher than those paid in departmental schools. In the Southern Division the number of schools rose from 834 to 884 and the attendance from 14,679 to 14,924. Of these, there are 164 Hindustáni, 240 Kánarese and 480 Maráthi schools. Sind returns show the existence of 439 mosque schools with an attendance of 5,275. The majority of these are of recent growth and owe their inception or birth to the stimulus of the aid which our system promises. 428 schools yet teach the Koran, and the average attendance does not exceed 13.

30. **Primary Schools for Girls.**—The attendance returns for girls' schools are as follows, showing an increase of 15 schools and 440 pupils :—

	Managed by Government.				Managed by Local Boards.				Managed by Municipal Boards.				Maintained by Native States.			
	1891-92.		1892-93.		1891-92.		1892-93.		1891-92.		1892-93.		1891-92.		1892-93.

Mr. Kirkham reports that the number of girls' schools of all classes in the Central Division has increased by 5 and of pupils by 740. The total number of pupils in girls' schools is 11,125, of whom 292 are little boys, leaving a total of 10,833 girls. Adding to this number of girls in boys' schools, *viz.*, 4,348, we obtain the total of 15,181 against 14,456, being a net increase of 725. Mr. Kirkham adds, "girls' schools flourish best in large centres and by the courtesy of my brother inspectors I am able to submit the following comparative table of the number of girls at school at the head-quarters of the four Educational Divisions and of the Island of Bombay :—

City.	Population.	Number of girls of school-going age.	Number of girls on Rolls.				Percentage of girls attending Schools to the number of girls of school-going age.
			Municipal Schools.	Aided Schools.	Others.	Total.	
Poona	118,790	8,909	773	1,262	104	2,139	24·0
Ahmedabad	144,451	10,833	70	911	301	1,282	11·8
Dhárwár	52,595	3,944	345	43	...	388	9·8
Hyderabad	54,569	4,092	352	266	...	618	15·1
Bombay...	821,764	61,632	974	2,451	1,691	5,116	8·3

The comparative figures given above are creditable to the Poona Municipal administration. I also attribute the large attendance in Poona to the stimulus and encouragement of the Poona Branch of the National Indian Association and to the zeal and success of the Missionary and other Societies which have devoted themselves to the work. The girls' schools of these Societies are a most valuable auxiliary to the work of the Department and of the Municipality, not only in their direct results, but in the indirect influence they exercise on our schools." Mr. Giles reports:—"With the girls attending boys' schools the total for the Northern Division is 23,204 girls or an increase of 165. Of the two schools maintained by Government at Ahmedabad and Baroda Camp, the former shows a considerable increase in attendance while the latter is stationary. Under Local Boards there is an increase of 4 schools and 177 pupils, but this is mainly due to the abolition of small Municipal Boards in the Surat District. The causes which have affected the attendance in boys' schools have told still more heavily on girls' schools, and it is satisfactory not to have to chronicle a general decrease. Efficiency has generally improved in Local Board schools. I would, however, note the existence of two girls' schools in the Surat District for teaching Urdu to Mahomedan girls, one of which is taught by the daughter of a Moulvi. There is also a special Mahomedan girls' school in Bulsár in the same district under the Municipal Board." Schools under Municipal Boards show a decrease of 2 schools and 209 pupils. Two schools have been transferred to the Local Board in Surat. The only town in which anything like a large increase in attendance can be noted is Borsad in the Kaira District. On the other hand, large decreases are noticeable at Godhra, Dohad, Broach and Thána. The prevalence of fever presumably accounts for this. The figures for next year should, however, be carefully watched, as the enthusiasm of Municipal Boards for female education is not generally great. In Native States there is an increase of 5 schools, but a decrease of 43 pupils. Aided schools in British Districts have increased by one, but the attendance in all schools under this head has decreased by 40. A small Mission school in Baroda Camp appears for the first time, and so does one at Anand, while a mixed school at Wallacepur is transferred to the list of the boys' schools. A large aided school at Bhuj has disappeared from the list and a small Mission school at Rájkot has been added. Unaided schools have increased by one and the number of pupils by 249. New schools have been opened at Gogha, Surat and Ahmedabad by the Irish Presbyterian Mission, the Niti Bodh Society and the Gujarát Vernacular Society, respectively. These schools will probably come on the aided list next year. The position of trained mistresses is gradually, I think becoming more secure, though there is a prejudice in many towns against Native Christian women who often are among our best teachers. The desiderata for girls' schools are more trained mistresses and assistants, and a greater expenditure of money, but Municipal Boards do not seem inclined to be generous to girls' schools, and the Local Board schools are usually small." Mr Patvardhan says:—"During the year under report the number of these schools remained stationary (135) but the attendance decreased from 7,679 to 7,630. Besides these, there are 7,788 girls attending boys' schools. Deducting 40 boys attending girls' schools, the total number of girls under instruction comes to 15,378 against 15,184 in the previous year." *Local Board Girls' Schools.*—The schools at Guttal and Hirekerur in Dhárwár were closed for want of attendance and the Urdu class at Nandgad was made an independent

school. Thus the number of these schools decreased from 41 to 40 and of scholars from 1,956 to 1,841. The Maráthi school at Nandgad continues to be under a trained mistress, the Urdu school there has been placed under an untrained mistress and six other schools have female assistants. These schools have not advanced beyond Standard IV except one or two schools in Dhárwár which contain classes under Standard V. The schools at Shigaón and Kalghatgi in Dhárwár, at Bágevádi in Bijápur, at Bankikodla in Kánára and at Kelshi in Ratnágiri are not well managed. The rest are reported to be doing fairly well. There are no girls' schools in Kolába. *Municipal Schools.*—The following table shows the number of schools and the attendance in them :—

District.	Number of Schools.		Number of Pupils.	
	1891-92.	1892-93.	1891-92.	1892-93.
Belgaum	5	5	316	326
Dháwár	13	13	1,148	1,140
Bijápur	4	4	165	154
Kánára	4	4	289	313
Ratnágiri	3	3	230	242
Kolába	5	4	318	208
	34	33	2,466	2,383

There is a decrease of one school and of 83 pupils. The decrease in the number of schools is nominal as the Hindustáni girls' school at Panvel being attended by more boys than girls is returned as a boys' school. In Dhárwár three schools are under mistresses and also there are 12 female assistants. Instruction in these schools has reached up to Standard VI and one girl in the Dháwár No. 1 school passed in that standard. In Belgaum there is only one mistress at Gokák and three famale assistants. The examination results compare favorably with those of last year. In Bijápur there are no mistresses, but there are three female assistants. The schools at Guledgud and the class attached to the Bágalkot Urdu School obtained satisfactory reports. The other schools did not do well. The accommodation is good everywhere except at Bijápur. *Native State Schools.*—There is an increase of two schools and 159 scholars, one in Janjira and the other in Jamkhandi. From the results recorded, it appears that the girls' schools in Native States have much advanced. The schools in Kolhápur continue to be under the supervision of Miss Little, Lady Superintendent, Female Training College, Kolhápur. The schools at Miraj, Rámdurg, Jamkhandi and Murud (Janjira) are under trained mistresses and are reported to be doing fairly well. The schools at Sángli and Sávantvádi are under untrained mistresses and are doing tolerably well. The school at Laxmeshwar (Miraj State) has kept up its reputation for good work. The school at Sávanur has kept up its efficiency and the school at Jath is reported to be in an elementary stage. *Aided Schools.*—The school at Roha-Ashtami in Kolába was closed and one school was given a grant by the Sávantvádi State ; thus the number of these schools remained stationary, but there is a slight decrease of 10 in attendance. The total number of institutions of this kind in Sind has decreased by one ; but the attendance has gone down from 4,919 to 4,549,* and the schools of all classes share in the decrease The aided schools have lost 223 girls and the Municipal Boards' schools show a falling off of 126 names. There are only 3 girls' schools which are wholly maintained by Local Boards, and all the three are situated in the Thar and Párkar District. The attendance has fallen off from 109 to 88, but the Nagar Párkar School (50 pupils) keeps up its reputation as the best conducted school. The Deputy Commissioner in speaking of the Nagar School says, "the girls are most well behaved, and orderly and are

* This, however, includes 742 boys attending the Girls' Schools, while, on the other hand, there were 6,266 girls attending the primary boys' schools, so the total number of girls in primary schools was 10,073 against 10,466 in 1891-92.

evidently most kindly treated and taught. Altogether the school is a most admirable one and reflects much credit on the Head Mistress." The school at Chelhar (20 pupils), which was opened only a year ago under much opposition, is now gaining ground. There has been no alteration in the number of girls' schools managed and maintained by Municipal Boards. The Wedderburn Girls' School, the Mahomedan Girls' School No. 1 at Karáchi and the Ratanchand Girls' School at Tátta are now headed by experienced and trained mistresses and are carefully supervised.

31. **Examination Results in Primary Schools.**—The divisional returns for all primary schools entered in General Table V are as under :—

Divisions.	Number of Schools.	Number of Pupils on the Rolls.	Upper Primary Stage.			Lower Primary Stage.						Total.		
			1			2			3					
			Boys.	Girls.	Total.	Boys.	Girls.	Total.	Boys.	Girls.	Total.	Boys.	Girls.	Total.
Central Division ..	2,398	137,987	37,655	2,544	40,199	47,062	4,394	51,456	38,089	8,243	46,332	122,806	15,181	137,987
Northern do. ..	2,996	192,727	58,595	3,815	62,410	66,898	7,617	74,515	44,030	11,772	55,802	169,523	23,204	192,727
Southern do. ..	2,403	139,123	40,008	1,543	41,551	51,480	4,947	56,427	32,257	8,888	41,145	123,745	15,378	139,123
Sind	1,474	54,425	7,237	342	7,579	24,736	5,667	30,403	12,379	4,064	16,443	44,352	10,073	54,425
Aden	36	1,555	123	15	138	392	90	482	848	87	935	1,363	192	1,555
Total ..	9,307	525,817	143,618	8,259	151,877	190,568	22,715	213,283	127,603	33,054	160,657	461,789	64,028	525,817

These figures show an increase of pupils in upper primary stage for every division except Sind and in lower primary an increase in the Central Division, Sind and Aden, but a decrease in the Northern and Southern Divisions, which may be chiefly attributed to an exceptionally unhealthy season as already noticed in a previous paragraph. The number of schools examined and the number of children passed are shown in the following table to be larger than the corresponding numbers for last year:—

Examination Results.

	Number of separate Schools examined.	Number of Pupils examined.	Standard I. Number of Pupils examined.	Standard I. Number of Pupils passed in: Arithmetic.	Standard I. Reading.	Standard I. Writing.	Standard I. Needle-work.	Standard II. Number of Pupils examined.	Standard II. Number of Pupils passed in: Arithmetic.	Standard II. Reading.	Standard II. Writing.	Standard II. Geography.	Standard II. V.—THE EDUCATION OF SPECIAL CLASSES.

32. **Rajkumar College.**—The number of pupils has fallen from 41 to 39. The pupils who joined were Kumár Dolatsinghji of Tharád, Kumár Manasia Wala of Mendarda and Kumár Gagubha of Lakhtar, and those who left were Ráo Sáheb Shiram Savant of Sávantvádi, Kumár Bhawanisinghji of Dhrángadhra, Kumár Rawat Khachar of Jasdan, Kumár Prathisinghji of Pol and Kumár Hippawala of Sanála. The list at present stands as under:—

	Age.
First Class.	
Kumár Lakhubha of Jámnagar	20
„ Bawa Vala of Vadya	18
„ Mulvaji of Kotda Sangáni	20
Second Class.	
Kumár Takhatsinghji of Mánsa	15
„ Dhansinghji of Lákhanka	13
„ Sursinghji of Utelia	16
„ Jethiji of Virpor	15
„ Hamirsinghji of Virpor	17
„ Vijaysinghji of Porbandar	19
„ Narsinghsinghji of Rájpipla	18
„ Digvijaysinghji of Rájpipla	16
„ Keshrisinghji of Rájpara	17
Third Class.	
Kumár Raning Vala of Mendarda	16
„ Amarsinghji of Vánkáner	14
„ Manasia Vala of Mendarda	17
„ Joravar Khanji of Warai	11
„ Himatsinghji of Mohanpor	17
„ Vijaysinghji of Lathi	14
Fourth Class.	
Kumár Takhatsinghji of Khirasra	17
„ Jorawarsinghji of Bhávnagar	10
„ Dolatsinghji of Pátdi	11
„ Ratansinghji of Amran	12
„ Valera Vala of Bilkha	19
„ Surag Kotila of Dedan	16
„ Jaswatsingji of Wadhwán	17
„ Kesharkhanji of Vajiria	16
Fifth Class.	
Kumár Bhayalvala of Sanala	12
„ Sher Jummakhanji of Junágad...	13
„ Jiwansinghji of Wadhwán	14
„ Hussein Yowarkhanji of Gidad	12
„ Vajsur Khachor of Jasdan	13
„ Unad Vala of Jotpore	14
„ Jitsinghji of Mándwa	16
„ Jorawarkhanji of Rádhanpur	17
Sixth Class.	
Kumár Mangalsinghji of Bhávnagar	11
„ Ramsinghji of Virpur	12
„ Bhiwa Vala of Bilkha	12
„ Gagubha of Lakhtar	11
„ Dolatsinghji of Tharád	11

On the 2nd of May 1892 the Principal, Mr. Macnaughten, proceeded on eighteen months' furlough to Europe and Mr. C. Waddington was placed in charge of the College. The annual examination was conducted by Mr. Chatfield, and Government Resolution No. 6118, dated September 28th, 1892, was issued on the receipt of his report.

33. **Talukdari Schools, &c.**—In the Northern Division the Tálukdári Girassia School at Wadhwán was examined by Mr. Giles, and a special report

submittted. The school was flourishing and successful. The Scott College at Sádra was unfortunate during the year, and an enquiry led to the reversion of the Head Master to service in Káthiáwár, and to the appointment of a new Head Master from the Rájkumár College. The Vajiria School has very small numbers and had made little progress during the year. In Káthiáwár, the kumár of the Jámnagar State was examined by Mr. Giles and also by Mr. Varkhad. Under Miss Brooke's charge he was found to be making excellent progress, and he is evidently a boy of good ability. In the Pálanpur Agency, 38 children were examined in various standards of the ordinary schools, and the nephew of the Diván of Pálanpur was attending the high school. In the Mahi Kántha, the number of children examined rose from 50 to 73. In the Rewa Kántha, the son, nephew and 2 nieces of the Rája of Chota Udepur attend the local school. One son of the Nándod Chief is under private tuition, and a daughter attends school, while the two sons of the Rája of Lunáváda are under private tuition. Eight other children of minor Chiefs attend local schools. In the Panch Maháls, 14 children of petty Chiefs are at school. In the Surat District, the son, brother and nephew of the Mahárána of Dharampor were specially examined by the Deputy Inspector and by Mr. Giles, and were making fair progress. The young Thákor of Rájkot, a nephew of the Dharampor Chief, was also specially examined, and passed in Standard I, and the Chief's daughter passed well in Standard III. Besides this 15 other minors or children of Chiefs were examined at the schools which they attended. The Deputy Inspector, Ahmedabad, returns 365 boys and 42 girls as attending local schools. Besides this, two boys from this district are at the Rájkumár College, and two in the Wadhwán School. In Broach, the young Thákor of Kerwada is under private tuition, and the Mátar Thákor is at the Wadhwán School Four sons of the Amod Thákor are at school, of whom one learns Anglo-Vernacular Standard III. The Shigam Thákor is at school and the two sons of the Sárod Thákor learn English under a private tutor. In the Thána District, there were no sons of Chiefs under tuition, and of 13 minors 6 are reported to be attending school and doing well. In the Central Division, in the High School at Poona, there are 3 minors as follows:—(1) The eldest son of the Chief of Bhor who studies under Standard III and whose progress is reported to be fairly satisfactory; (2) P. M. Fadnavis, a representative of Nana Fadnavis, who is studying Standard V and making good progress; (3) N. R. Shirke, a scion of the Gáikwár family, who is in Standard III, but has been hampered by bad health In the High School at Sátára, there are 7 minors, namely, (1) V. N. Mutalik in Standard VI, who has earned a good report both as to progress and conduct; (2), (3) and (4) S. M. Bhosle, M. R. Sumant and G. R. Sumant, who are making fair progress; (5), (6) and (7) G. B. and S. T. Ráje Bhosle and G. P Pratinidhi, who also are doing well. Surupsing Khatza Valni, Chief of Ráisingpur, attends the New English School at Dhulia. He studies Standard III and bids fair to be soon ready for transfer to the high school. In the Southern Division, the Sirdárs' Class attached to the Rájárám College at Kolhápur is attended by 6 young Chiefs against 7 of last year. Dádásáheb of Hebli was withdrawn from the class as the revenue of his Jághir was too involved to allow of the expense of his remaining at Kolhápur. The Principal, Rájárám College, reports of the Senior Division that though not brilliant pupils they are all industrious and making fair progress except Annásáheb of Miraj, who was absent a good deal owing to illness and his marriage. The Junior Division consists of Appásáheb of Kápshi, Bhausáheb of Sátára and Bábásáheb of Lakápur, learning Standard II, and is doing fairly well. Kápshikar began English rather late and works extra at that language with his tutor. Alumal Trikumdas reports of Mirs' Schools:—"The school at Miran-jo-Tando has now been placed under a more qualified and experienced teacher, Mr. Bulchand Khubchand Adváni of Rohri. His love for work has already begun to effect some good. I have strengthened the teaching staff by the appointment of a trained Vernacular teacher. The school at Mir Alimardan-jo-Tando has on the whole made fair progress."

34. **Mahomedans.**—The number of Mahomedan pupils of all kinds in the Central Division has still further risen from 14,672 of last year to 14,805, of whom 12,151 are in the institutions common to all, and 2,654 in special Mahomedan schools. In colleges there is an increase of 22 students, in primary boys'

and girls' schools of 169, whilst there is a decrease of 29 in secondary and 29 in special schools. The Local Board school at Nasirabad and the Municipal schools at Yával and Faizpur have received special mention this year for efficiency. The chief event of the year was the opening by His Excellency the Governor of the fine new building for the Anjuman-i-Islam High and ancillary schools on the Esplanade, Bombay. In the Northern Division Mr. Giles says :—"The total figures have risen from 28,673 to 29,017, an increase of 344. The increase is general in all classes of Institutions, except in the Arts Colleges where the number has fallen from 5 to 2. It is a most depressing fact that in the whole Division there should only be two Mahomedans studying for a degree. It is, however, satisfactory to note a considerable increase in the attendance at secondary schools, and it is remarkable that the number of girls in these schools has risen from 1 to 8. There is also a large increase in the number of Mahomedan girls in primary schools, and I would note that in the Surat District there are two Local Board Urdu schools for Mahomedan girls, one of which is in charge of a mistress who is the daughter of a Moulvi. The percentage of Mahomedans in primary schools is comparatively higher than that of Hindus, but they do not remain so long in school, do not study the higher standards, and few come up for the Public Service and Training College examinations. They may thus be said to lose the most substantial benefits which could be obtained from education. In secondary and higher education their position is notoriously backward, but I think the general tendency is towards improvement, and I believe that the community at large is becoming more and more aware of the necessity for that self-improvement which can only be obtained by education." In the Southern Division the total number of Mahomedans receiving education in public schools is 16,768 against 16,830 in the previous year. The decrease is small and calls for no special remark. In secondary schools and in Industrial schools there is an increase. The number of special schools and classes for Mahomedans in the Southern Division is distributed as under :—

	Schools and Classes.	Attendance.
Local Board	103	3,933
Municipal	28	2,044
Native State	54	2,412
	185	8,389

All these schools and classes were examined during the year and are reported to have improved in efficiency. Among the Urdu schools in Native States, those at Miraj, Sávantvádi and Janjira are doing well. At Sávanur the State has opened a new Persian school. Eight Mahomedan students passed at the 3rd Grade Public Service Certificate examinations held during the year, of whom one was a Kázi Sháhábudin scholar from Ratnágiri. In Sind the number of Mahomedan boys and girls under instruction stood at 36,868 at the close of the year against 36,746 on 31st March 1892. In Secondary schools the percentage of Mahomedans to the total number of pupils borne on the rolls was 9·8 against 9·5 in the previous year.

35. **Aboriginal and Hill Tribes.**—In the Central Division the total number of scholars belonging to Aboriginal and hill tribes is nearly the same as last year, *viz.*, 1,429 against 1,432. Of the total number 1 is in the Poona Training College, 1 in a Secondary school, 8 are under instruction as pupil teachers, and the remaining 1,419 are in various primary schools. In the Northern Division the loss shown last year has been recovered, and the figures for this year are 5,729 against 5,475 last year—an increase of 254. There are now 6 boys in secondary schools, or 4 more than in 1891-92. The Deputy Inspector, Broach Sub-Division, spent Rs. 869 during the year on special encouragement to Bhil and Talávia students, and reports that though the total number at school had not increased, more were examined under the standards and the general standard of efficiency was considerably higher. Five students

were employed as assistants or monitors during the year. In the Panch Maháls there was a small increase in attendance and the Deputy Inspector reports that he has employed 4 Bhils as assistants in vernacular schools. In Surat there is an increase in attendance in Local Board schools, but a decrease in Municipal and Native State schools. One Kaliparaj boy passed in the Public Service Certificate Examination in this division. In the Mahi Kántha there are now five special Bhil schools under the Reverend Mr. Thompson of the Kherwara Bhil Mission. Last year there were three schools under the Mission, and this year two more have been transferred from departmental control. Mr. Thompson's schools are well managed and efficient. The I'dar State also provides two scholarships for Bhils in the Sádra school and both the scholars passed in Standard V in this year. In the Rewa Kántha marked progress has been made during the year, the number of special schools for Bhils having risen from 25 to 34, and the number of pupils from 704 to 947. The increase in schools is entirely due to the liberality of the Nándod State. Mr. Shewan, the Administrator, has spared neither pains nor money in his effort to extend education among the aborigines, and the special expenditure on scholarships, prizes and rewards to masters for the year was no less than Rs. 906. The Sunth Rámpur State is also liberal in its treatment of the Bhils, but the other States do not follow the example set. The record for the year is thus a favourable one, and it is pleasing to note that not only has lost ground been regained, but a steady advance made in all those parts where the education of these backward people is of the greatest importance. In the Southern Division the number of children belonging to this class has increased from 79 to 85.

VI.—SPECIAL INSTRUCTION.

36. The figures for the last two years are as under:—

	1891-92.		1892-93.	
	Schools.	Pupils.	Schools.	Pupils.
Normal Schools for Masters, paragraph 37 ...	8	674	8	705
Do. for Mistresses, paragraph 37 ...	7	179	7	175
School of Art, paragraph 38	1	286	1	264
Drawing classes, paragraph 39	3	192 *(3,474)	4	265 (3,816)
Medical schools, paragraph 40	4	216	4	210
Veterinary College, paragraph 41	1	40	1	39
Gymnastic Institution	1	180	1	196
Agricultural classes, paragraph 42	4	55 (405)	4	59 (369)
Forest class, Science College	1	19	1	25
Engineering school, paragraph 43	1	14	1	21
Industrial schools, paragraphs 44 and 45 ...	16	1,220 (1,459)	17	1,286 (1,319)
	47	3,075 (5,338)	49	3,245 (5,504)

* The figures in brackets represent pupils already entered in the returns of schools for general education.

37. **Normal Schools.**—The table given below shows the number of trained and untrained teachers employed by Local and Municipal Boards and by Native States:—

			Number of trained Head Masters.	Number of untrained Head Masters.	Number of trained Assistants.	Average pay of trained Head Masters.	Average pay of untrained Head Masters.
						Rs. a. p.	Rs. a. p.
Central Division ...	Bombay City		28	28	59	32 6 6	27 0 0
	British Districts...	Local Boards ...	750	701	185	17 1 8	8 13 5
		Municipal Boards.	153	92	120	23 15 6	10 14 10
	Native States		3	69	...	12 5 4	8 12 10
Northern Division...	British Districts...	Local Boards ...	653	520	53	17 14 5	12 2 1
		Municipal Boards.	148	44	92	27 4 4	13 15 3
	Native States		673	605	109	16 10 9	11 9 0
Southern Division...	British Districts...	Local Boards ..	888	360	108	16 10 11	10 1 1
		Municipal Boards.	87	64	53	24 4 7	11 5 7
	Native States		154	382	75	16 10 7	10 14 5
Sind Division ...	British Districts..	Local Boards ...	209	87	68	25 1 5	15 4 7
		Municipal Boards.	31	33	27	40 9 3	32 15 0
	Total ...		3,777	2,985	949		

This total shows that the number of trained head masters has increased by 87, while the number of untrained head masters has diminished by 20, or that 67 new schools have been opened each with a trained head master. Of the Central Division Mr. Kirkham reports the number of Male Training Colleges as the same as last year, *viz.* 2. The number of students in Poona Training College has risen to 177 against 149 of last year. At the Terminal Examination 19 passed the third year's course, 40 the second year's course and 71 the first year's course as against 18, 38, and 69 last year. Out of the 130 passed, 62 were duly certificated and sent out as teachers. The remaining 68 were retained for further study. The number of inmates in the boarding house was 159 and their discipline was satisfactory. The Principal, Ráo Sáheb V. B. Sohoni, retired at the close of the year after a faithful service of 30 years in the Department and was succeeded by Ráo Sáheb B. R. Sahasrabudhe. In the Dhulia Training School there were 53 students at the end of the year against 51 of last year. At the Terminal Examination, 14 students appeared for the second year's certificate and all passed, and all the 36 students who appeared for the first year's course passed. This Training School has two boarding houses, one for Hindus and the other for Mahomedans, and both were found in a satisfactory state. The Poona Female Training College contained 29 students against 30 of last year. Three mistresses were certificated during the year and sent out as mistresses. There are 8 boarders in the Huzúr Pága under the supervision of Miss Hurford, the Lady Superintendent, whose management of her duties was as successful as in previous years. The Christian Vernacular Education Society's Normal School at Ahmednagar continued its excellent work during the year under the management of Mr. J. S. Haig. Mr. Giles reports of Premchand Roychand Training College, Ahmedabad, that during the year Government sanctioned medical attendance for the College, and the Principal has established a small dispensary. In the annual examination 45 men passed the first, 37 the 2nd, and 29 the 3rd year's course. Of 117 scholars examined 19 were schoolmasters who had joined the College for further training. The results of the examination were generally very satisfactory. The drawing and agricultural classes were well attended. There are now 136 students in the College who are drawn from all parts of the Division. The practising school attached to the College has 166 boys on the roll with an average daily attendance of 118. It is highly efficient and popular. The record of the year's work is a very satisfactory one. Mahalaxmi Female Training College, Ahmedabad, contained at the close of the year 215 women and children. The results of the annual examination were that 10 students passed in the first, 10 in the 2nd, and 5 in the 3rd year's examination. The result was satisfactory. In the Rájkot Training College 20 out of 28 passed in the 2nd year's course, and 26 out of 30 in the 1st year's course. All the 7 scholars who attended the

Ahmedabad Training College in the 3rd year's course passed in the 1st class. The results obtained in Rájkot were fairly good. The States sanctioned a considerable sum for the improvement of the College buildings and additional books and apparatus. In the Barton Female Training College at the annual examination 15 students were examined, 7 in the 3rd year, who all passed, 5 in the 2nd year, of whom 4 passed, and 3 in the 1st year, all of whom were successful. An entrance examination was for the first time held this year as the number of applications for admission exceeded the number of vacant scholarships. The Code of the College was revised during the year, and the duties of the College Committee defined. The College is making satisfactory progress, and was as usual exceedingly well administered by Miss Spencer. There are three Training Colleges in the Southern Division, *viz.*, two for males and one for females. Of these, one for male is at Dhárwár managed by Government and the other two are at Kolhápur maintained by the State. The Government Training College is attended by 134 students against 129 in the previous year. 62 students passed the first, 39 the second, and 13 the final examinations. The results of the certificate examination were, as last year, very satisfactory. The practising school attached to the Training College shows improvement both in number and efficiency. The Principal took his students on an excursion to Mysore, visiting Bangalore and Seringapatam on the way and showing them places of historical interest. The sanitary arrangements of the College are excellent and the premises are kept scrupulously clean. The general health of the students was very good throughout the year. The lawn-tennis court opened last year is well used and the students occasionally play foot-ball and other games. Training School for Males at Kolhápur is attended by 18 students against 17 of last year, all reading for the 1st year's course. Out of the 16 candidates examined for certificates only 4 passed, 3 in the 1st class and one in the 2nd. Training School for Females at Kolhápur has an attendance of 9 pupils against 6 of last year, all reading for the 1st year's course. Five pupils were examined during the year, of whom 3 passed and were given certificates. The school is well housed and well equipped, and is well looked after by Miss Little, Lady Superintendent, Female Education, Kolhápur. In Sind the Hyderabad Training College for Masters continues to maintain a high state of efficiency. The names on the books stood at 64 at the end of the year against 68 on the 31st March 1892; a smaller number of Mahomedans having competed at the entrance examination. Nevertheless, there are 26 Mahomedans at College against 1 Brahmin and 37 other Hindus. The results of the examination for certificates were highly satisfactory, and the following passes were secured :—

For the final or 3rd year certificate, 15 students appeared and 13 passed, of whom 7 obtained 2nd class and 6 got 3rd class certificates.

For the 2nd year certificate, out of 26, who appeared 22 passed; and of these 3 obtained 2nd class and 19 received 3rd class certificates.

Of the 1st year students 22 passed out of 25 presented. The total number of those who passed was 57 out of 66 presented, or 86 per cent.

The conduct and discipline of the students have been reported to be highly satisfactory. The carpentry and turnery classes are now held within the College premises and are under the immediate supervision of the Principal. The utility of the training of the eye and the hand is now understood and appreciated and a growing taste for carpentry is being exhibited. The number of students in the Hyderabad Female Normal School rose from 12 to 16 during the year. Of these, 9 were Mahomedans and 7 Hindus. At the annual examination, 2 ladies (both Hindus) passed the 2nd year examination and obtained certificates, and 1 passed the 1st year test. This is satisfactory considering the short time the school has been in existence. In the Karáchi Convent Normal School at the end of the year there were 12 names on the roll, and at the annual examination held in June 1892, 2 first year, and 4 second year students were awarded certificates of proficiency. The results of the examination were pronounced to be creditable. The Karáchi Municipal Female Normal Class had on its roll 32 pupils at the end of the year; 18 Mahomedans and 14 Hindus. Of these 10 studied for self-improvement only in special subjects; and of the 13, who could

be presented for examination in December last, 6 (4 Hindus and 2 Mahomedans) passed. One passed the 1st year examination, which does not qualify for a certificate, and of the remaining, 3 obtained the 2nd year certificate, and 2 were awarded the final certificate of proficiency. The class continues under the supervision of the sisters of the convent. This class is doing admirable work in the way of disseminating knowledge among native women.

38. **Sir Jamsetji Jijibhoy School of Art.**—The attendance returns for the last two years are as under :—

	Average daily attendance.	Average monthly number on the Rolls.	Number on the Rolls at the end of the year.	Fee Receipts.
1891-92	209	263	286	4,469
1892-93	205	270	264	4,186

The distribution of pupils throughout the different classes is shown below :—

	1891-92.	1892-93.
Elementary or Drawing School ...	264	264
Architectural Drawing Class ...	37	33
Painting Atelier	36	40
Sculpture Atelier	9	7

The annual examination was taken by Messrs. Stevens and Wimbridge and the number of students who passed the examination was, for the two years, as under :—

	Number of Students examined.				Certificates granted.			
	1st Grade.	2nd Grade.	3rd Grade.	Total.	1st Grade.	2nd Grade.	3rd Grade.	Total.
1891-92 ...	23	50	72	145	8	18	19	45
1892-93 ...	18	39	66	123	4	22	10	35

The number of students who passed the black board examination has again risen, being 14 as against 12 last year. In this examination the examiners return 56 per cent. of the candidates as against 48 per cent. last year as succeeding in passing. In the Architectural Drawing class 13 students were awarded certificates, two prizes were given and the general progress of the class during the year under report, especially of the senior students, has been very satisfactory. In the painting Atelier five prizes were awarded and the examiners give satisfactory reports. In the sculpture Atelier 5 prizes were given and 7 students were highly recommended. In the Reay Art Workshops the number of apprentices has a little decreased from 86 to 79. The Principal explains that he had difficulty in getting the apprentices to find sureties and to sign agreements binding them for a term of years. He is of opinion that the apprentices should be bound by indentures. A skilled enameller has been obtained from Delhi for the workshops. Each of the six sections of the workshops is now in full work in turning out articles both useful and ornamental. The total expenditure on the workshops increased from 8,425 to 10,997, but the sale proceeds increased yet more largely from 1,617 to 4,517. The annual excursion was conducted by Mr. Griffiths to Ahmedabad, 24 students accompanied him.

39. **Drawing Classes.**—Mr. Griffiths reports that the number of students who learn drawing in schools for general education has risen from 11,199 to 12,385 and that the results of the annual examinations were as under :—

	1st Grade.			2nd Grade.		
	Number of Pupils examined.	Number of Certificates granted.	Number of Prizes awarded.	Number of Pupils examined.	Number of Certificates granted.	Number of Prizes awarded.
1891-92	1,752	469	43	220	71	16
1892-93... ...	1,802	420	16	278	95	5

Candidates from the following institutions have done best in First Grade, *viz.*, the College of Science, the Israelite School of the Anglo-Jewish Association, the Poona New English School, the Sátára High School, the Dhulia High, School the Surat High School, the Dhárwár Basel Mission High School and the Sirdárs' High School, Belgaum. The Poona High School again heads the list of Second Grade with 12 certificates and 1 prize, followed by the Dhárwár High School with 8 certificates and 1 prize; the College of Science with 5 certificates, the Ratnágiri School of Industry with 4 certificates and 1 prize, and the Israelite School of the Anglo-Jewish Association, the Kala Bhuvan Baroda and the Bijápur High School each with 4 certificates. Messrs. Griffiths and Greenwood were able to visit a few classes and their remarks are published in Appendix F. The annual list of schools sending up candidates for the grade examinations is published below :—

40. **Medical Schools.**—The number on the rolls at Poona was 92. Of the 92 pupils 18 were paying students, while there were 22 native medical pupils; 32 civil medical pupils; 14 stipendiary pupils; 6 Native State pupils. 27 students appeared for the final examination, of whom 24 passed with credit. In the Byramji Jijibhoy Medical School, Ahmedabad, the number of pupils in attendance was 77 against 83 last year; the receipts from fees have been 1,032 against 1,038 last year. Of the 77 pupils 37 were paying, 11 native medical puils, 15 stipendiary pupils, 13 civil medical pupils, and 1 free pupil. 19 students passed in all subjects in the final examination. In the Hyderabad Medical School the number of pupils was 32, the same as last year: of these, 2 were paying pupils and 25 were stipen-

diary. Ten candidates were put up for the final examination and all passed. The Midwifery School has 9 pupils, 8 Mahomedan and 1 Native Christian: during the year the school passed 6 midwives.

41. **Veterinary College, Bombay.**—The College has been throughout the year in charge of Veterinary Captain J. Mills. The number of students on the 31st of March was 39. At the annual examination 18 candidates passed, out of 38 who were examined. 5 obtained the diploma of graduate of the College. 6 passed the second and 7 the first professional examination. One student proceeded to Edinburgh to study for the diploma of the Royal College of Veterinary Surgeons. The students that entered during the year are reported as a decidedly better stamp of men for the work than in previous year, and amongst them were two Europeans, three Eurasians, and two Portuguese. Local Fund Boards and Native States maintained ten students at the College, of whom eight are Hindus, one Budhist, and only one is a Mahomedan. Out of the five men who passed the Diploma Examination all obtained employment on salaries averaging from Rs. 75 to Rs. 125 per mensem.

42. **Agricultural Classes.**—The class at Hyderabad was examined in December last by a committee composed of Mr. Bayliss, the Engineer in charge of the Hyderabad Water Works, and Mr. Balchand Vasanmal, Supervisor, Public Works Department. The performances of the examinees were pronounced to be satisfactory, and 11 men of the 2nd year were recommended for certificates, which secure preference for employment to the post of Tappedárs in the Revenue Department. Five of the 1st year men were adjudged as qualified to enter upon the studies of the 2nd year class. The annual examination of the high school classes was conducted by the College of Science and the results were as under:—

Name of High School.	First-year Students.		Second-year Students.	
	Number sent up.	Number passed.	Number sent up.	Number passed.
Násik	9	7	4	4
Ahmednagar	7	6	...	...
Ahmedabad	5	3	7	7
Surat	16	11	...	...
Sholápur	13	7	...	...
Kolhápur	5	5	...	...
Total ...	55	39	11	11

43. **Engineering Class.**—The classes in the College of Science have already been noticed in paragraph 14 of this report. The examination of the Engineering Class attached to the Sind Arts College has already been noticed in Government Resolution, Public Works Department, No. 437 E.—1975 of 14th December 1892. 4 second-year men presented themselves, of whom 3 passed. There were no third-year students.

44. **Industrial Schools.**—The increase in the number of schools is caused by the opening of an industrial school at Ahmednagar by the American Mission. The Government grant to the Apprentices Home, Byculla, was Rs. 1,875 against Rs. 414 last year, owing to the increased number of pupils claiming the grant. Mr. Kirkham reports "the David Sassoon Reformatory was inspected by Mr. Sahasrabudhe, who recorded a favourable opinion of its condition. The English class has been abolished and in the Vernacular and Gujaráti portions education is given up to Standard II and Standard III, respectively. Boys under 12 do nothing but schooling, whilst those above that age get instruction for 2 hours a day only and the rest of the time is devoted to the workshop, which has greatly developed during the year. Both the Vernacular and Gujaráti classes did very well at the examination, and the boys appeared to be properly taken care of." The institution was visited by Dr. T. Cooke in November 1892, who reports "the

workshop has made steady progress during the year, and the value of the work done has increased from Rs. 15,284 in 1890-91 to Rs. 21,155 in 1891-92. The amount of work done, and the profits obtained therefrom have largely increased under the superintendence of Mr. Thomson." The school workshops attached to the Byculla Boys' School and the American Mission School, Ahmednagar, though not industrial schools under the code, are both valuable adjuncts to the school work proper. The Nagar School has been a great success. The smaller schools were inspected by Dr. Thomson who reports favourably of all except the S. P. G. Mission School, Ahmednagar, where the work done by the boys is described as of a very rough and unfinished nature. In the Northern Division, the Bhuj School shows a decline of 9 in the number on the rolls and the small school attached to Mr. Lowji Maistri's workshops at Ahmedabad contains 14 pupils only as in last year. This school now appears under the head of Aided Schools as it is assisted by the Ahmedabad Municipality. In the Southern Division the technical class attached to the Government Training College at Dhárwár is attended by 59 pupils against 52 of last year. Forty-five learn carpentry and 14 smithy. The progress of the class was recently tested and has been reported to be satisfactory. The workshop was inspected by Dr. Cooke, the Collector of Dhárwár, and some members of the District Local Board, and it seemed to have made a favourable impression. It received a grant of Rs. 300 from the District Local Board, Dhárwár. The proper equipment of the workshop is under consideration and arrangement has been made under Government sanction to purchase certain articles belonging to the defunct gin factories in the Dhárwár District. The Industrial School at Ratnágiri is attended by 187 pupils against 150 of last year. The industrial branch of the institution was examined by Dr. Thomson, Professor of Engineering, College of Science, Poona, in February last, who remarked that the results in carpentry were good and the boys did very well in drawing. The want of a suitable building for the institution has been supplied. The results of the examination were fairly satisfactory. The attendance consists of 21 Bráhmins, 160 other Hindus, and 6 Mahomedans. In Sind, there were 22 schools or classes of this kind with an attendance of 1,238 at the end of the year as against 1,380 reported at the close of the previous year. All schools have been fairly equipped and provided with suitable workshops. The syllabus of instruction as drawn up by Mr. Jacob, and translated into Sindhi has systematised the work of the Industrial Schools, and is of great help in comparing progress. The workshop at the Sind Madressah has been recently furnished with all necessary tools and appliances, and placed under the instruction of a qualified teacher obtained from the Railway Workshop at Karáchi. The Hyderabad Municipal Industrial classes have not been favourably reported upon on the whole.

45. **Victoria Jubilee Technical Institute.**—The average number of day students on the rolls monthly throughout the year was 170 against 230 last year. The average daily attendance was 157 against 212 last year. The students who attended day classes between November 1891 and September 1892, included 6 Europeans and Eurasians, 13 Portuguese and Native Christians, 4 Jews, 76 Parsis, 4 Mahomedans, 84 Bráhmins, and 75 all Hindus who are not Bráhmins or of the low castes. The students who attended evening classes, included 38 Europeans and Eurasians, 4 Portuguese and Native Christians, 3 Jews, 6 Parsis, 3 Bráhmins, and 2 all Hindus who are not Bráhmins or of the low castes. There are attached to the Victoria Technical Institute for technological subjects—

Fourteen Free-studentships and entrance scholarships, candidates nominated by the donor.

The Board awards annually to the students of the Institute, who are in regular attendance, and gain the highest aggregate number of marks at the yearly examinations :—

5 scholarships,
10 prizes, and
1 gold medal.

In addition to the above there were 14 scholarships awarded to entrance students during the Session 1892-93, *viz.* :—

5 by Native States,
4 by Public Bodies,
4 by Municipalities, and
1 by Government, Central Provinces.

the candidates being nominated by the donors.

Extracts from the reports of the examiners will be found in Appendix G.

47. Government Inspectors.—The Central Division was in Mr. Kirkham's charge till the 25th December 1892 when he was obliged under medical advice to take privilege leave, Mr. Sahasrabudhe, Deputy Inspector, Khándesh, acting for him. Ráo Sáheb L. V. Paránjpe, Deputy Inspector, Sholápur, a zealous and deserving old servant of the department, died suddenly on the 9th January 1893, and Mr. M. V. Kirtane was appointed in his place. Mr. Kirkham says : "I received most willing and able assistance from all my Deputies, and Mr. Sahasrabudhe carried on the work so efficiently during my absence on short leave

that at the end of the official year there were no arrears of any kind." Mr. Giles reports: "I was on privilege leave for 3 months from July to October, and Mr. Oliver acted as Educational Inspector during the period." Mr. Giles specially mentions the Assistant Deputy Inspector, Panch Maháls, Mr. Gulábdás Gópáldás, and the 2nd Assistant Deputy Inspector, Surat, Mr. Jan Mahomed, as conspicuous for their energy and the amount of work performed. The Inspector, Southern Division, reports "as regards the work of Deputy Inspectors and their assistants, I am glad to report that it was on the whole satisfactory. All the schools were examined during the year except three new schools in Dhárwár and one in Jamkhandi. In Sind the inspecting staff has been strengthened by the appointment of 3 Assistant Deputy Educational Inspectors to cope with the growing work in connection with indigenous schools. The Deputies and their Assistants all worked with zeal and energy during the year and were able to complete their work in time.

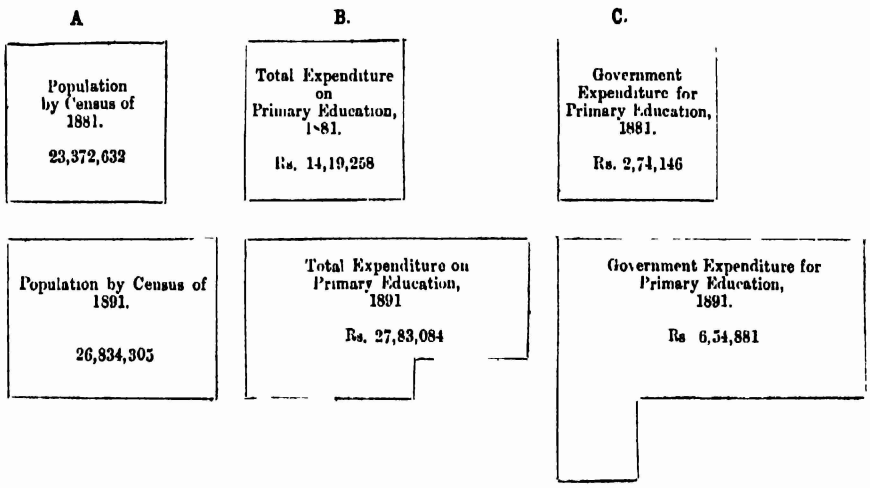
48. **Physical Education and School Apparatus.**—Extracts from the reports of the Educational Inspectors will be found in Appendix II. Mr. Kirkham reports that the Educational Library and Museum in Bombay shows no waning in usefulness or popularity under the careful management of Mr. Dubásh. New educational works on teaching and all subjects of school-study to the mumber of 410 were during the year added to the Library, which now contains upwards of five thousand volumes.

49. **Encouragement to Literature.**—The annual statements for the Book Depôts will be found in Appendix I. The list of registered libraries has been enlarged by the opening of a library at Amalner in Khándesh District, and there are now 45 libraries in the Central Division, 54 in the Northern, 30 in the Southern and 8 in Sind. The Vernacular Committees in Poona, Ahmedabad, Dhárwár and Hyderabad have continued their labours on the preparation and improvement of school books; and Rs. 5,077 were spent by Government on useful books, the most important payments being Rs. 870 for Douglas' Bombay and Western India, Rs. 600 for Fowler's Discipline and Instruction, Rs. 500 for Treatise on Physics, Vol. III, Rs. 406 for Sindhi Arithmetic, Rs. 250 for Manual of Geography of Sind, Rs. 800 for Mr. V. U. Lálváni's Arithmetic for advanced students in Training Colleges, Rs. 550 for Mr. M. B. Námjoshi's Shilpakala Vidnyán, Rs. 350 for Mr. G. J. Agáshe's Arthashástra Mulatatve, Rs. 199 for Mr. Islámpurkar's Brihatkatha Ságar and Rs. 160 for Mr. H. K. Damle's Maráthi Translation of Arabian Nights. The Dakshina Committee awarded prizes to the aggregate value of Rs. 575 and the total expenditure from the Dakshina Fund was as under:—

	Rs.	a.	p.
Allowances to Bráhmans	411	0	4
Do. to teachers and students ...	17,636	15	0
Payments to authors	2,634	8	0
Total ...	20,682	7	4

50. **Conclusion.**—The report for the year 1892-93 shows that the grand total of persons receiving instruction at institutions of all sorts reached the highest figure yet recorded, namely, 646,382 against 634,438 in the preceding year. This represents 16·05 per cent. of the school-going population at school, or 27·5 per cent. for the male population and 3·87 for the female population of the school-going age, which is taken at 15 per cent. of the whole population. Of the total number of pupils 575,369 were attending 9,794 public institutions as against 566,606 at 9,501 such institutions in the previous year; and 71,013 pupils attending 2,813 private institutions against 67,832 at 2,771 in the previous year. The increase of 293 public schools and 8,763 attending them was fairly distributed over the various grades of instruction. With regard to the distribution of ways and means available, it appears that of the total outlay of Rs. 66,35,186 on education, Rs. 60,77,707 or 91·6 per cent. of the whole were spent on direct educational charges, and of this amount less than half, namely, Rs. 28,84,824, was devoted to primary education. A comparison of the returns available shows that the progress of primary education between the dates of the census of 1881 and that of 1891 has been very considerable. Comparisons

between the returns of single years are of little value as liable to be affected by temporary non-recurrent factors which in a longer period such as that between two census returns are eliminated. It will be seen that in the decennial period 1881—1891 the population increased 14·8 per cent., but the total expenditure upon primary education increased 96·1 per cent., while if we compare the amount of Government expenditure at the beginning and the end of this period the increase is 138 per cent. These figures do not prove that the existing provision is adequate, but they show that provision for primary education has not been neglected and that Government has been so fully alive to its importance that the proportionate increase in the Government expenditure is nearly 53 per cent. more than that from Municipal, Local and all other sources. The relative increase of population, total expenditure and Government expenditure is shown by the graphic illustrations which are added :—



The increase is seen to be greater under B than under A and greater under C than B. In spite of exceptionally unfavourable conditions in the Northern Division, the general results of the year show progress and development under all the several heads of Colleges, High and Middle Schools, and Primary education.

R. G. OXENHAM,
Acting Director of Public Instruction.

Poona, 11th August 1893.

* The percentages required for 2 (a), 2 (b), 2 (c), are calculated from the figures given in columns 8a, 8b, 8c, respectively, of General Table IV.

† The annual cost is calculated on the *direct* expenditure only. The average cost of educating each pupil is obtained by dividing the direct expenditure by the average number on the rolls monthly during the year.

‡ The average cost of each pupil in Local Fund and Municipal Schools is to be obtained from the figures given in General Table VII

§ Fractions of a rupee should be omitted, except in the columns showing the average annual cost of educating each pupil.

I.—Fractions of a rupee are to be omitted.

II.—If the income of any school maintained by Government (or by a Local or Municipal Board) exceeds the expenditure, the return of Government (or Local or Municipal) alone exceeds the expenditure, the excess income and sources from which it is derived should be shown in the column of Remarks.

III.—If the income of any aided school exceeds the expenditure, the excess should be proportionately deducted from the sub-head of Endowments, and all other Funds should be shown in full.

IV.—In calculating the expenditure from Provincial Revenues or any other Fund, all payments or contributions from Fees or other sources credited to that Fund

V.—The expenditure under University, Direction, Inspection, Scholarships and Miscellaneous should be shown only in column 8 and its sub-divisions, and not in

VI.—The expenditure on stipends held in Training Schools should be shown as part of the expenditure in those schools, not under the head of Scholarships.

VII.—The expenditure entered in columns 5a, 5b, 5c and 5f should be included in column 8e and not in column 8a, 8b and 8c. The expenditure entered in column

expenditure should be reduced accordingly, the income and expenditure of the school being thus equalised. If in such school the income from fees or other private sources sources; or, if the receipts from those sources are insufficient, from the sub-head of Fees also. The actual receipts from Provincial Revenues and from Local and Municipal should be deducted. Such payments should be shown as expenditure under the sub-heads to which they belong. the preceding columns.

5d should be included in column 8d.

GENERAL TABLE V.

Return of the Stages of Instruction of Pupils in Public Schools for General Education, in the Bombay Presidency, at the end of the official year 1892-93.

Class of Schools.		Number of Schools.	Number of Pupils on the rolls on 31st March	High Stage. Comprising all Pupils who have passed beyond the Lower Secondary (Middle) Stage, but have not passed the Matriculation Examination. 1			Middle Stage. APPENDIX B.

Extract from the Report of the Principal, Grant College, Bombay.

6. *General progress and conduct of Students* :—I have again the satisfaction of bringing to notice the admirable results of the improved laboratory training on the attainments and discipline of the students. Judging from observation at home last year I am certain that Physiology and Chemistry are better taught here than in any Medical School of the United Kingdom. It means of course untiring labour on the part of the Professors and their assistants to produce such good results with such ill-educated material as the students who come to be taught. How much better might the results be, had the students received a sounder priliminary general education. The conduct of all classes has been, as usual, exemplary.

9. *University Examinations* :—For the Examination in Elementary Mechanics of Solids and Fluids 66 candidates appeared, of whom 43 passed. At the First Examination in Medicine there were 71 candidates and of these 38 passed. For the Second Examination in Medicine 34 were successful out of 55 candidates. These are better results than have been recorded for many years. There were 48 candidates for L. M. and S. and of these only 17 passed, seven of whom, including one woman, were in the First Class. As usual, the greater proportion of the failures were those who had already failed on previous occasions.

12. *General Observations* :—This has been an uneventful year for the College. All our efforts have been directed to progress and improvement in teaching and to the further consolidation of the reforms previously introduced. There still remain many matters of less moment to attend to, and even these would have been dealt with long since, had I been able to devote sufficient time to them. I now regard the College as in a more flourishing condition than it has ever been. The teaching is excellent, the internal arrangements are satisfactory and the means and appliances for instruction are all but complete. What we now require is more teaching power and better intellectual material to work upon. * * *

N.B.—Clinical instruction in Medicine and Midwifery, Surgery and Ophthalmic Medicine and Surgery was also given on each week-day during the Sessions.

APPENDIX C.

Extract from the Report of the Acting Principal, College of Science, Poona.

The following table shows the religion and caste of the apprentices:—

Hindus	109
Europeans and Eurasians	8
Native Christian	1
Mahomedans	7
Jews	2

II.—Agricultural Department.

10. The number on the roll of the agricultural class at the end of the year under report was 27, eight more than last year. At the Diploma Examination in Agriculture, which was held for the first time this year, 3 candidates appeared, all of whom passed the examination in the Second Class. For the Second Examination in Agriculture 5 candidates appeared, all of whom passed the examination. For the First Examination in Agriculture, 14 candidates appeared, of whom 12 passed the examination.

III.—Science Class.

12. This class is intended for students who proceed to the University Degree for B. Sc. The number on the roll of the B.Sc. class at the end of the year was 7, being 4 more than last year. Last year 8 candidates appeared for First B.Sc., of whom 4 passed the examination. For the Second Examination for the Degree of Bachelor of Science 4 candidates appeared, of whom 2 passed the examination.

Forest Class.

15. There are at present 25 candidates on the roll in this Department. The Conservator of Forests, Northern Circle, sent 4 candidates, the Conservator of Forests, Southern Circle, sent 4, and the Conservator, Sind Circle, sent 1 candidate only. At the Final Examination held in September last 7 candidates appeared, of whom 6 passed the examination.

APPENDIX D.

Statement showing the receipts and disbursements of the District Local Boards during the year 1892-93.

APPENDIX F.

Extracts from Messrs. Griffiths and Greenwood's remarks on Drawing Classes

High School, Ahmedabad. The number on the rolls learning drawing is 41, but only about a dozen pupils were present when I inspected the class. Of these only two were 2nd grade, the remainder being all 1st grade. The drawing class is in a very backward state.

High School, Baroda. Here the drawing classes are in a very flourishing condition, due to the interest which the Principal takes in the subject, and from the fact of Mr. Ghodke, the drawing master, being a good teacher. The drawing classes are held in a well lighted airy room, each pupil sitting at a desk to himself, an excellent arrangement.

Kala Bhuwan, Baroda There are classes for elementary and advanced free-hand and model drawing; also for shading from the round, and for architectural drawing. Lectures are given in plane and solid geometry and in perspective. The classes meet in airy and well lighted class rooms, and they are furnished with good materials, examples and appliances.

High School, Broach. The classes meet morning and evening before and after school hours. The teacher appeared to be conducting his work in an intelligent manner.

College of Science. The students were doing their work well and had been carefully instructed. It was a pleasure to note that the teacher, Mr. Tukaram Ramkrishna, took a good deal of interest in his work and had a mind open to possible improvements in methods and means of instruction. The teacher is well supplied with models and other materials, and has himself at considerable trouble collected a number of examples of ornament and written a set of notes on 1st grade drawing.

Poona High School. The Second Grade students were preparing specimen model drawings, and on the whole the work was good. Mr. N. V. Bhade, the teacher, takes an intelligent interest in his work and has given much time to preparing examples for his students.

The Training College. The teacher here is Mr. Bhade. Most of the students seem to have made good progress for the time they have been working, but some of them are rather old to begin to learn anything requiring skilful hand-work.

Panch Howds Industrial School. About a dozen boys belonging to a carpentry class here learn drawing, free-hand, model and plane geometry. The finished class work of the studends was neat, accurate and on the whole well drawn and showed careful supervision.

New English School. In addition to the usual 1st and 2nd grade work there are here one or two students working at 3rd grade. But the place is not a good one for making any study of light and shade.

The Nutan Marathi. There were not many students drawing at this school. The work done was fairly good and the students seemed to be carefully looked after.

Municipal Technical School. In this drawing class every thing was in a muddle, the students were drawing anyhow and showed no evidence of proper training The examples were all mixed up together, some of them which were meant to give elementary instruction in measurement drawing were evidently unintelligible to the teacher, and I found that they were used only as examples of free-hand drawing The drawing teacher is the only one I met in Poona, who does not know English, and I think ignorance in this is a great hindrance to the acquisition of knowledge bearing on the work of a teacher. Some of the completed drawings shown me were fairly good, but, as I have said, the way in which the students were drawing was extremely loose.

Poona City School and the Native Institution. The drawing classes at these schools are very much alike and are under the same teacher, Mr. S. K. Pimpalkhare. The teacher is, I think, an intelligent man who seems to take an interest in his work.

Bishop's High School. Mr. Pimpalkhare teaches here also with fair success and I found his services well appreciated by the Head Master and the students.

Victoria High School. There is not much to be said about the drawing class here. I cannot help thinking that if the mistress or her assistants could teach drawing and brought to this subject the same energy and ability they showed in their other work, the students would in all probability draw better than they do now.

While on the whole one cannot but speak well of the character of the Poona teachers; there is still evidence that the men should be more thoroughly trained as teachers before obtaining appointments. A teacher's class seems necessary where the teachers in training shall work a certain number of hours a week steadily all through the year. I think too that it is desirable that all teachers should have a fair knowledge of English.

APPENDIX G.

VICTORIA JUBILEE TECHNICAL INSTITUTE.

Extract from the Report of Mr. J. Cobban, Examiner in Machine Drawing.

"I have examined the Third Session Students in Machine Drawing and find that a very large percentage of the students thoroughly understand the Science of Machine Drawing, and only require a little practical experience in a drawing office to make them good draughtsmen.

Almost all the students show that they understand projection well, a fair percentage have passed first class and the percentage of failures is very small indeed. The principal defects seem to be in not attending to details and in not answering the written questions, a few, however, answered these questions very well indeed, so well that they got full marks for doing so."

Extract from the Report of Mr. Alfred W. Seabrook, M. Inst. Nav. Arch., M. Inst. Mech. Eng., M.Inst. Mar. Eng., Examiner in Steam.

"I have the honor most respectfully to submit and forward herewith my report of the results of the Examination of (31) Thirty-one candidates held at the above Institute on the 15th instant, whose answers I have carefully gone through and consider the marks very fairly awarded.

I consider the results are good and the working of the problems on the whole very fair showing most of the candidates have proved that they understood the questions they have worked out and that they must have paid great attention to the lessons they had received at the Institute, at the same time a few of their answers have given some trouble in their not complying with the Rules and General Instructions laid down for their guidance on the Examination papers."

Extract from the Report of Mr. W. H. Wolff, A. M. I. C. E., Examiner in Mechanics: Theoretical and Applied.

"I have the honor to return herewith all examination papers and other forms noted below, having reference to and showing the results of, the Examination of the students of the Third Session examined in Theoretical and Applied Mechanics. Out of a total of 32 students four passed in the 1st class, five in the 2nd, and eighteen in the third, while five have failed to acquire the marks required for passing.

It has given me very much pleasure to act as examiner of these students, and I am sure from what I have seen, that the successful ones will become most useful engineers after the sound teaching they have received at the Institute."

Extract from the Report of Dr. W. M. Alexander, M.A., B.Sc., B.D., M.D., C.M., Examiner in Sound, Light and Heat and Electricity & Magnetism.

"I have the honor herewith to return the papers on (1) Sound, Light and Heat and (2) Electricity and Magnetism.

On the whole the papers were very creditably done, except those on Sound, Light and Heat by the Engineering Students, Extra Session Class. The answers throughout showed a good practical knowledge of the subjects on hand and a good grasp of theoretical details, specially where practical instruction was combined with oral. There was no trace of copying."

Extract from the Report of Surgeon T. D. Collis Barry, M.R.C.S. (Eng.), F.R.S. (Ed.), F.C.S., F.I.C., Examiner in Physics.

"In forwarding the results of the Examinations in Physics: Laboratory Practice just completed, I have to report that of the eighteen students who appeared for examination twelve have passed.

The Cotton Class and Evening Students deserve special commendation as there has been not a single failure in either of these classes. The Engineering Class has not done so well, four out of the nine candidates failing to pass the Examination. The work of the Students taken generally is good."

Extract from the Report of Mr. F. Stewart Lamb, R.I.M., M.I.Mat. E., Examiner in Technological Mechanical Engineering Tools Lectures.

"The Students have not done so well this year as might have been expected. The Students have still the habit of not reading their questions through properly before answering and so many gave answers which were not required and lost marks. The Sketches very few attempted, the paper may have been rather long."

Extract from the Report of Engineer F. F. Pickard, R.I.M., Examiner in Pattern-making and Foundry.

Viva Voce:—"Taken altogether the students showed a very fair knowledge of the subjects in which they were examined, the only difficulty being that they were hampered in freely expressing their thoughts, so that in some cases it took a little time to find out what they really wished to say. The questions given were similar to, and perhaps, slightly harder than those given at previous examinations, and were of a purely practical nature, such as would occur any day, in a Foundry, or a Pattern-maker's shop.

In Practice, the patterns given to be *Moulded* were of a much more difficult nature than those set in previous years and those students who have gained a First Class in this work, have got it by dint of sheer hard work and ability and well deserve it. In *Pattern-making* also the subject set the students was difficult, and very few could complete it in the time allowed. Marks having been awarded to the best of the patterns, marks were given to others according to their approach to its excellence."

Extract from the Report of Mr. W. W. Squire, M.Inst.C.E., Examiner in Smithy and Fitting.

"I have the honor to report that the results of the Examinations in the Fitting and Smithy departments are very satisfactory as regards the small percentage of failures and high percentage of First Class men. In *viva voce* 18% in Fitting and 5½% in Smithy failed to satisfy the Examiners, but the proportion who obtained two-thirds marks and over was double that in the practice.

The quality of work in the Smithy department was excellent. In Fitting there was some first class work, but the general average was not so good as in the Smithy. In the *viva voce* of the Fitting department there would probably have been fewer failures if one group of candidates had not made a silly attempt to drag in the answers to questions which had been put to the preceding group, instead of relying on their own knowledge."

Extract from the Report of Mr. F. Stewart Lamb, R.I.M., Examiner in Machine Tools and Lathes.

"The students have done very well in the Lathes and Machine Tools Departments. Out of a total of 53 Students 20 have gained 1st Class, 16 have gained 2nd Class, 5 have passed, there are only 2 failures, which I consider very good. The *viva voce* questions were not answered so well as they should be, the students giving an answer without thinking what they were saying; and so many lost marks."

TECHNOLOGICAL COTTON MANUFACTURE LECTURES.

Extract from the Report of Mr. Louis Rushworth, Examiner in Technological Cotton Manufacture Lectures.

"I attended the Institute for the purpose of examining the 3rd Session students, the questions being written ones; out of the 4 students examined two have passed in the 1st Class, one in the 2nd Class and one in the Pass Class. Some of the questions were answered in a masterly manner showing that the students understood what they were doing"

TECHNOLOGICAL COTTON MANUFACTURE PRACTICE.

Extract from the Report of Mr. E. Parkinson, Examiner in Scutching, Carding and Framing.

"The *viva voce* questions and practical work at the examinations in *Scutching, Carding* and *Framing Departments* were of a superior kind.

The students of this session were below the standard of the students formerly examined by me with the exception of few.

The students of all the three departments were much the same in confounding the *viva voce* questions.

In practical work the students in many cases showed carelessness on their part in not trying to be careful.

There were also several over confident, not looking over their work a second time. On examining I found articles slightly out of place."

Extract from the Report of Mr. P. Harrison, Examiner in Ring-spinning and Mule-spinning.

"With reference to the examination held in September last in *Ring-spinning* and *Mule-spinning*, I beg to say that the majority of the students answered the questions put to them in a good style and did the practical work allotted to each of them in a first class manner. Others I found wanting in many respects, but I may say taking all together the examinations passed off fairly well, and there seems to be some improvements on last year's work."

Extract from the Report of Mr. Joseph Holden, Examiner in Weaving.

"I beg to report upon the examination in the Weaving Department held in the Ripon Textile School on Friday, September 9th. The questions set were of a thoroughly practical character, and covered a great amount of ground, I regret, however, to say that the results were not as satisfactory as at past examinations. I arranged the questions as hard as I liked, and I think they are not very easy ones. To give an idea of the subjects on which I examined the students, I may tabulate them as follows: Reeling, Knotting, Bundling, Winding, Warping, Sizing, Heddles and Shedding, Picking and Tappet-setting, Weaving and putting in coloured heading, Analysis of Cloth, defects and how to remedy them, on parts of Loom and their uses."

APPENDIX H.

Physical Education.

Central Division (Mr. Kirkham).—There is nothing of a marked kind to report in connection with physical education. All classes of schools are now alive to its importance and a general all round progress may I think be recorded. The central gymnasium in Bombay continues to work smoothly under the rules sanctioned two years ago, and our up-country gymnasts who go through the course and return to their stations are by general consul all the better for the training, and work more intelligently. The number of students in the central gymnasium at the end of the year was 196 of whom 134 were Parsis, 46 Brahmins, 10 Mahomedans, 4 Portuguese and 2 Jews. The course of gymnastics followed, which was drawn up by myself in consultation with the committee, has met with the approval of competent judges; but I still think it would now be well, with the experience of the past two years, to have it revised by a real expert possessed of the latest and best knowledge on the subject. In regard to high schools the Elphinstone in Bombay is distinguished by the number of its pupils who are members of cricket clubs, and a school-cricket club was established or rather revived during the year with the aid of the late Mr. Sorabji S. Bengali, the Honourable Mr. Justice Telang and others. Poona has at last succeeded in its quest for a good cricket ground. The place selected contains four acres but is unfortunately about a mile distant. Sátára makes excellent use of its recently acquired ground and local efforts are being made to put up some necessary sheds. Sholápur boys are admitted to a gymnastic and social club on liberal terms, but the question of a separate school gymnasium is borne in mind with reference to the project now under discussion for a new high school building. The Nagar High Schools favour gymnastic exercises rather than out-of-door games as does also to some extent the Násik High School. Dhulia High School combines both plans with excellent effect both on the physique and morale of the boys. The Poona and Dhulia Training Colleges continue to pay due attention to physical education, and the subject is making fair progress also in primary schools. The annual Reports of the Deputy Inspectors report 100 Primary schools as having gymnastic apparatus and 88 as having school gardens.

Northern Division (Mr. Giles):—The principal feature of the year has been the appointment of trained gymnastic instructors to the High Schools at Surat, Broach and Wadhván. These instructors have been selected from native regiments, and the two last named are seconded in their regiments, and called up for a month's annual training. They can thus return to the army at any time. Other instructors in our High Schools have now been passed through the Bombay gymnasium and obtained certificates, but they cannot be said to be equal to the military instructors, who also have a knowledge of drill which is most useful in all institutions. However I have noted in the past year a great advance in the smartness of the drill in several institutions. In Surat the gymnasium is now used for the benefit of the town schools generally, and has been taken in charge by the Municipality which contributed so largely towards its erection. * * * In Native States all the High Schools have fairly suitable play grounds. Cricket continues to become more and more popular, and matches between schools and local clubs and between rival schools are of frequent occurrence. The game bids fair to take a great hold upon the people, and the exploits of Kumar Ranjitsinghji (an old Rajcumar College boy) in England have created general interest. There are players in the schools of Gujarát and Rájputána who would be worthy of a place in an English public school eleven.

The Deputy Inspectors generally report a growing interest in physical exercises, and I have found a simple system of rewards to masters for good work shown in the gymnasium to be very useful. * * * * I would especially mention the school in the small Native State at Bansda where the boys, under a trained teacher, showed agility and smartness that would not have disgraced a military gymnasium.

Gardens.

Ahmedabad	66
Kaira	42
Broach...	13
Surat	54
Thána	38
Total	213

The marginal figures show the number of gardens attached to schools in British districts. There is an increase of 25 over last year, due mainly to the Ahmedabad and Kaira districts but there is also an improvement in Surat and Thána.

From Native States only some 40 gardens are returned.

Museums.

The Thána District still holds the first place, but in Surat an attempt has been made to form a museum in no less than 60 Local Board Schools, and in several Municipal Board Schools. In Ahmedabad also the Deputy reports that a beginning has been made in several schools, and this has been the case too in Káthiáwár.

Southern Division (Mr. Patvardhan). All the Government High Schools and the Training College in this division have been supplied with competent teachers of gymnastic and drill, and I am glad to note satisfactory progress in this branch of education all round. The gymnasium attached to the Rájárám College, Kolhápur, continues to hold the first place in this division and gymnastics are taught there as part of regular school course. Drill is also compulsory; but Mr. Candy reports that he does not see as yet that thoroughly beneficial effect that he hoped for. The playground is fit as yet only for foot-ball, but cricket is not lost sight of. In the rainy season the Rájárám College eleven played the Deccan College eleven at Poona and a return match with the same eleven at Kolhápur, defeating the Deccan College eleven in both the matches. Rowing is also practised during the dry season. In short all branches of athletics are well attended to at Kolhápur. The gymnasium in the Dhárwár Training College is in an excellent working order and the Harris tennis-court continues to be used both by college teachers and students. A small playground has also been prepared for the use of the practising school children and the Principal reports that it is a very pleasant sight to witness the young lads playing the different games including cricket with zest. The garden in the front quadrangle is well kept up and vegetables are grown in the back yard with the help of students. The 2nd competitive exhibition of physical exercises was held at the college in October last, when 13 prizes—three of Rs. 12, three of Rs. 10, three of Rs. 8 and four of Rs. 5 - were given away. Of these 6 were won by the college students, two by the practising school boys, three by the High School students and two by boys from the Municipal Marathi School. In the Dhárwár and Ratnágiri High Schools, all the classes receive regular instruction in gymnastics and drill. The only drawback is the want of spacious playgrounds and sufficient gymnastic apparatus. Kárwár has neither a gymnasium nor a playground. But the boys are made to use the apparatus in the rear compound and go through drill under the special teacher. * * * * * Foot-ball and other games continue to be popular. The gymnastic apparatus at Bijápur, though scanty, continues to be fully used and the want of a playground has been partially removed by the local Municipality by allowing the use of a plot of ground near the Native General Library for cricket and other games. The schools at Miraj Sángli, Jamkhandi, Mudhol, Rámdurg and Sávantvádi have suitable gymnasia under special teachers, but have no playgrounds. Cricket and lawn-tennis are played at Miraj and gardening is made part of regular school work at Sávantvádi. The playground attached to the Mission High School at Alibág and lawn-tennis court and the gymnastic apparatus in the compound of the Basel Mission High School at Dhárwár are fully used. The London Mission High School at Belgaum is still without a gymnasium or a playground. 155 schools or 16 more than last year have been supplied with simple gymnastic apparatus, which are made use of by the older boys. The Municipalities of Dhárwár, A'thni Nipáni, Mahád and Kárwár have engaged special teachers of gymnastics and the Sirsi Municipality having constructed a gymnasium intends to employ a special teacher ere long. The vernacular school at Murud in Janjira has a well equipped gymnasium. The new trained masters have awakened a taste for gymnastics and school drill among their pupils and we may expect considerable improvement in this branch of education. 133 schools or 6 more than last year, have small gardens reared with the help of school boys.

Sind (Mr. Alumal Trikumdas). The Sind Art College maintains its lawn-tennis court and its cricket club, but foot-ball, which was started during the course of the year, is more in favour with many a junior student on account of its novelty. The cricket club in the N. J. High School is kept up with spirit. It played 7 public matches during the year, two with Sergeant Kenny's team and one with the Foot Battery Club. The opposing elevens were very much stronger than the High School which was of course defeated. But the High School club won 4 matches in which the opposing elevens belonged to the (1) Royal Dublin Fusileers, (2) the Mahomeden Madrassa, (3) St. Patrick's School and (4) the Sind Arts College. The N. J. High School is indebted to the liberality of the Karáchi Municipality for its spacious play-

ground, which has been walled in and kept in order, cleared and levelled at the expense of the Municipality. Shikárpur has recently got the free use of a large piece of land from Government for the encouragement of manly games, and the Hyderabad Municipality has set apart a large plot of ground for the purpose of a cricket field for all schools in the city. * * * The gymnasium at Shikárpur is in good order and suitably equipped, but not well attended for want of a competent gymnastic tutor. The Karáchi High School has not yet been able to secure the services of a good and permanent gymnastic teacher, but its arrangements enabled it to secure a much larger and regular attendance at gymnastic sports than any where else. The Hyderabad Training College for masters has now got a permanent gymastic instructor and the students are said to go through their exercises "with smartness and life." In a good Primary school, Local Board or Municipal, physical exercise and school drill form a part of the regular school work and are allotted a place on the time table. The result of this regular training is apparent in the precision and orderliness with which children assemble, change classes, and dismiss. The most encouraging feature of physical education is the fact that the sports taught in the cess schools are being copied and practised in some of the older indigenous schools under aid in the Karáchi district.

APPENDIX I.

Central Book Depôt.

Administration Report:

Annual Report on Education in the Bombay Presidency for the year 1892-93.

No. 2732 of 1893.

EDUCATIONAL DEPARTMENT.

Bombay Castle, 12th December 1893.

Letter from the Acting Director of Public Instruction, No. 3357, dated the 30th September 1893—Submitting a copy of his Annual Report on Education in the Bombay Presidency for the year 1892-93.

Attendance in schools.

RESOLUTION.—It was noticed in reviewing the report for the year 1891-92 that the grand total of persons receiving instruction at institutions of all sorts had reached the highest figures yet recorded, namely, 634,438, and it is satisfactory now to observe that the number has advanced to 646,382. This represents 16·05 per cent. of the school-going population at school, or 27·5 per cent. for the male population and 3·87 for the female of the school-going age, which is taken at 15 per cent. of the whole population. Of the total number of pupils 575,369 were attending 9,794 public institutions as against 566,606 at 9,501 such institutions in the preceding year; and 71,013 pupils attending 2,813 private institutions as against 67,832 at 2,771 in the preceding year. The decrease noticed last year of 71 scholars in professional colleges has been to a small degree recovered by an increase of 17 in the year under review; and the decrease of 28 in training schools almost wholly recovered by an increase of 27. This year there is some increase, either great or small, in the attendance at every class of public institution.

2. The increase in the attendance at public schools has been very differently distributed among the different classes of schools in 1891-92 and 1892-93. In the former year it was divided among all the classes except Government schools, which showed a minute falling off, while more than half the whole increase pertained to aided schools. But in 1892-93 the increase is much more evenly divided, and all classes share in it except Municipal Board Schools, which alone show a falling off in attendance, their substantial increase of 2,587 in 1891-92 being met by a decrease of 170 now.

3. The general increase in attendance is this year shared by each of the eight classes according to race into which the population is for this purpose divided. The change in position in this respect of the aboriginal and hill tribes is very satisfactory. But the small Jewish community has in proportion to its numbers by far the largest share of the increase. The number of pupils learning English has risen from 45,496 to 46,945. Regarding the increase in attendance as to the sex of the pupils, the number of boys has risen from 499,174 to 507,028 and of girls from 67,432 to 68,341. His Excellency in Council notices with pleasure the commendation bestowed by Mr. Kirkham on the Poona Municipality for the encouragement it gives to female education. From the table on page 22 of the report it appears that 24 per cent. of the girls of school-going age in Poona are attending school.

Ways and means.

4. The expenditure on education has continued to rise, the figures for the last four years being—

	Rs.
1889-90	56,67,450
1890-91	59,52,344
1891-92	62,80,704
1892-93	66,35,186

To this increase of Rs. 3,54,482 the local cess has contributed Rs. 87,226, municipal rates Rs. 48,245, fees Rs. 48,382, and "other sources" (which would appear to be mainly the revenues of Native States) Rs. 1,70,311. The ratios of contribution have this year been worked out separately for British districts and for the whole Presidency with the following results:—

	British Districts.	Presidency.
Provincial funds	35·5	29·7
Local cess	17·2	14·3
Municipal	7·4	6·2
Fees	21·9	20·9
Revenue of Native States	·2	12·4
All other sources	17·8	16·5

Apportionment of funds.

5. Classifying institutions according to the sources of their maintenance it is seen that all classes have shared in the increase of expenditure except aided institutions, which this year show a slight decrease due to smaller outlay upon buildings. And classifying them according to their educational character it is seen that all classes share in the increase except the University and Professional Colleges. The decrease in the case of the former is perhaps partly due to a smaller grant being made by Government, and in the latter merely to the fact of special grants for apparatus having been made in the previous year.

In the distribution of Provincial Funds the most marked features are the larger share given to primary schools, amounting to Rs. 37,551, and to special schools, amounting to Rs. 15,481, and the smaller grants for buildings and apparatus. The reduction in the annual Government grant for buildings from what it was for several years previously is due to the gradual absorption of the large balance which stood to the credit of Government in 1888-89. On the other hand it is satisfactory to know that by utilizing the balance for school buildings as well as other much-needed public works, a large number of claims for grants-in-aid of school buildings have been met. Greater expenditure on the Sir Jamsetji Jijibhai School of Art and the development of the agricultural and forest classes attached to the College of Science, Poona, were the causes of the larger grants under the head of special schools.

University Education.
(1) Arts Colleges.

6. Of the Arts Colleges the following showed an increase in the number on their rolls at the close of 1892-93:—

Elphinstone.	St. Xavier's.
Deccan.	Sind.
Wilson.	Fergusson.

And the following had fewer numbers than at the close of the previous year:—

Rájárám.	Gujarát.

while the Sámaldás College showed no variation. The increase in the Elphinstone, Deccan, and Wilson Colleges was very large and the falling off in the Gujarát College considerable. The number of candidates from Arts Colleges and the College of Science who succeeded in passing University Examinations was 502 as against 452 in the previous year.

(2) Law Schools.

The attendance in the Bombay Law School, which was 278 in 1891 and 200 in 1892, fell to 182 at the close of the year under report. This falling off is reported to be due to the application of new rules for admission to the University Examinations; but it is anticipated that the check will not be of a lasting nature. The serious decrease in the amount received from fees has materially interfered with the project Government had in hand for the improvement of this institution. In the Poona Class the number of students rose from 22 to 27. In all 18 students passed the 1st LL.B. Examination, one passed the 2nd, and 43 passed the examination for the degree of LL.B.

(3) Medical College.

The number of students in the Grant Medical College rose from 203 in 1891 to 222 in 1892 and 239 in the year under review. And 89 students passed examinations as against 74 in the previous year. The Principal, in reporting on the general progress of the students, expresses himself as thoroughly satisfied with the results of the improved laboratory training on the attainments of the students; and considers that the instruction given in Physiology and Chemistry can compare favourably with that of any Medical School of the United Kingdom.

(4) College of Science.

The attendance at the College of Science which fell from 222 to 214 in 1891-92 rose to 260 in the year under review; and 110 students passed examinations in Engineering or Agriculture as against 51 in the previous year.

Secondary Education.

7. The number of pupils attending High Schools and Middle Schools compares thus with the numbers in 1891-92:—

	1891-92.	1892-93.
High Schools	23,876	24,004
Middle Schools	19,544	20,219
Total ...	43,420	44,223

Out of these 1,478 of the High School and 2,439 of the Middle School pupils are girls.

Out of 1,571 candidates sent up by the schools for the Matriculation Examination 917 or about $\frac{3}{5}$ths passed. Besides these 137 privately educated candidates passed, out of 1,348 sent up, or about $\frac{1}{10}$th only, making a total of 1,054 as against 916 in the previous year. And out of 557 sent up by the schools for the School Final Examination 263 or nearly one-half passed. Besides these 136 privately educated candidates (out of 909 sent up) or only about one-sixth passed, making a total of 399 as against 364 of the previous year. His Excellency in Council observes that at Poona the fee receipts and at Thána both attendance and fee receipts show a decrease owing to the strong competition of private schools. It is satisfactory to find that the demand for education enables such institutions to thrive; but if the falling off in the Government schools continues it will become a question whether there is any obligation on Government to maintain its own institutions any longer, seeing that private enterprize promises to supply the demand for higher education.

European Schools.

Besides the above High Schools and Middle Schools there are also, classed under the head of secondary schools, 40 schools for Europeans and Eurasians. The whole number on the rolls at the close of the year was 3,860. The number of such schools has fallen in successive years from 48 to 45, 44, and now 40, but the numbers attending them have at the same time increased. Of the present total 2,052 are boys and 1,808 girls.

Primary Education.

8. The total number of primary schools for boys has risen from 8,354 to 8,615 and of Primary Schools for girls from 677 to 692 and the pupils from 477,031 to 481,124 boys, and from 41,253 to 41,693 girls. The increase has been chiefly in the Northern Division, and especially in the Native States there, and in Sind, chiefly in the aided schools. Amongst the Native States those of Morvi and Rájpipla have displayed a most commendable advance in the establishment of new schools. The Inspectors speak favourably of the progress of the Local Board Schools, but not so favourably of the Municipal Board Schools, the supervision over which is said in many instances to be defective. In this respect Surat and Karáchi are noticed as distinguished exceptions. And the general falling off in attendance at Municipal schools in the Northern Division, which may be partly attributable to a very unhealthy season, has not extended to the Panch Mahals. Night schools are diminishing in number almost everywhere.

Education of special classes.

9. The number of Muhammadans attending schools and colleges has increased in all the Divisions except the Southern, where there is a slight decrease, but it is much to be regretted that a very insignificant number aspire to a degree. As Mr. Giles remarks, it is depressing to find that there are in the Northern Division only two doing so. The education of the aboriginal and hill tribes is carefully attended to in the Broach subdivision and in the Mahi Kántha and Rewa Kántha Agencies and most especially in the Rájpipla State.

Special instruction.

10. Under the head of special instruction a moderate advance is seen. The Normal Schools for masters, the Drawing Classes, the Agricultural and Forest Classes, the Engineering and the Industrial Schools, and the Gymnastic Institution all show some increase in attendance; and a diminution—in each case very slight—appears only in the rolls of Normal Schools for mistresses, Medical Schools, the School of Art and the Veterinary College. His Excellency in Council observes with pleasure that all the workshops of the Reay Art Institution are in full swing, and that to judge from the increase in the sale-proceeds, *viz.* from Rs. 1,617 to Rs. 4,517, the output meets with approval and generous patronage. The addition of a skilled enameller from Delhi will, it is to be hoped, result in one of the most highly finished and decorative manufactures in India finding a home in Bombay. It is satisfactory to find that increased attention is being given to the study of drawing, without which the higher grades of a technical education can scarcely be reached. The successful students of the Veterinary College appear to have found employment at once, and it is noticeable that this branch of special education is becoming particularly attractive to Europeans and Eurasians. There was a small increase in the attendance at Industrial Schools at large, but it is noticed with regret that there was a considerable falling off of pupils attending the Victoria Jubilee Technical Institute.

11. His Excellency in Council observes that in General Table II the cost of educating males and females has been worked out for each sex under the head "Direct expenditure" but not for "Indirect expenditure"; and unless there is some insuperable difficulty in doing so, he considers it would be advantageous to work out the cost for each sex under the sub-heads Direction, Inspection, Scholarships, and Buildings, of "Indirect expenditure". Viewing the work of the year as a whole it appears to be undeniable that a very reasonable rate of progress has been maintained, for which the officers of the department deserve every credit; but His Excellency in Council trusts that the inspecting officers will use every opportunity of efficiently checking the real circumstances of the primary schools in the less accessible parts of the Province. In other reports doubts have been cast on the reliability of the attendance rolls as regards scholars, and even on the regular presence of masters, which give cause for some apprehension that an unexpected visit would not invariably disclose the same neatness and numbers which are forthcoming when the neighbourhood of an inspecting officer is well known.

12. The tables given on page 41 of the report of the Acting Director of Public Instruction show at a glance that not only has Government expenditure for primary education increased in the last decade in proportion to what was allotted in 1881 far more rapidly than has the population in that period, but that it has also outstripped the increase of expenditure from all sources. But how much remains to be done can be judged from Appendix A, General Table I, which shows that the percentage of Educational Institutions on the number of towns and villages in the Presidency is but 31·12.

13. This review would not be complete if it omitted to mention the retirement, after 30 years of most valuable and loyal service, of Mr. Waman Abaji Modak, late Principal of the Elphinstone High School: and this occurrence affords the Acting Director of Public Instruction the opportunity of drawing attention to the great expansion that has taken place during the 30 years that have elapsed since Mr. Modak took one of the first four degrees conferred by the University, both in the demand for and the supply of a higher education: and in the respon-

sibilities which have thereby devolved upon the University as an examining authority. In 1862-63 the total number of candidates who presented themselves for examinations of all kinds was 185: in 1892-93 it was 6,281.

14. Copies of the Report and of this Resolution should be forwarded to the Government of India and the Secretary of State.

G. C. WHITWORTH,
Acting Secretary to Government.
